Please deny their request for an increase of \$35.00 flat rate regardless of usage. Stop the gouging. Don't they make enough millions of dollars? I'm a senior citizen living on social security and it only goes so far.

Please docket the attached in the case number above.

Though I do understand the need to update the infrastructure of the gas lines, why is it that the company banked income for years without reinvesting in its pipelines, instead wants to charge its customers for the upgrades. This doesn't seem fair in our present economy? People can barely afford to eat and pay rent. SO, I do not support an increased rate to the average customer to cover the cost of something you should have been planning for. I feel this is comparable to a gas station charging customers for pump upgrades. This is overhead expenses.

This fee is completely outrageous. We already pay 28.00 for months that we do not use the service and there is no maintenance, upgrade or anything to warrant these charges. If this is to be raised I will be seriously considering changing over to an alternative heat source and canceling Vectren!

Since I have an electric water heater and don't use my furnace at all during the summer I think it is ridiculous that I also have to pay 2750 already just to have my pilot light stay on all summer so that I don't have a connection and a disconnection charge every year adding additional fees to the current situation will cause an unusually large number of customers to be unable to meet their financial obligations who are already on utility assistance I don't think it's necessary for one of the only Industries to continually make a 25% profit to have additional fees to stabilize their capital investment I think it's ridiculous that the government allows Public Utilities to gouge customers simply because their public utility that's a private company as well that continues to make outrageous profits

I am on a fixed income and cannot afford ANY form of rate increase for gas utility. I think it is unfair to customers that use very little or low gas usage!!!!!!

Do NOT approve the minimum charge of \$35 that Vectren is requesting because it's unwarranted and the public should not be punished for trying to be energy efficient. We work very hard to keep our bills low, insulate our homes and now we are to be punished? No. Senior citizens cannot afford these increases. Poor people cannot afford these increases. Do NOT approve this request.
