Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Tuesday, November 20, 2018 1:52:28 PM

Dear PUCO Docketing Division,

Ohio needs to rebuilt our energy system towards the future to promote clean air, water, and soil for healthy living, to improve our economy through good paying jobs in Ohio, and to ensure that life will survive on our planet. We have waited too long and time is ticking.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Becky Georgiton

Dear Public Utilities Commission of Ohio:

SAY YES! YES! YES! to American Electric Power (AEP)'s proposed SOLAR ENERGY PROJECT and ask that my comment be docketed in case No. 18-501-EL-FOR.

Don't let Duke or any of the other dirty fossil fuel powered utilities bully you into killing this wonderful project. This is the true future of public electric power. Trump should kiss Big Coal goodbye no matter what he thinks he can do to save it. It is going away because "We The People" are not going to put up with dirty air and water any longer.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

GREEN ENERGY JOBS ARE GROWING FASTER THAN ANY OTHER SECTOR!

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your efforts!

Dear PUCO Docketing Division,

Renewable energy saves lives, saves money, and stops the destabilization of our global climate system. Ohio can be a leader in these efforts!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Eric Engle
