Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Thursday, November 29, 2018 1:31:40 PM

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Donna Walker

Dear PUCO Docketing Division,

It would be wonderful for Ohio, for both jobs and reputation. Right now Ohio is considered backward and not moving forward into the new world where each State has a moral responsibility to protect the future of our planet! Being the lead State on Solar manufacturing and sales would bring Ohio into the forefront of positive example to the rest of the country. It is time Ohio has the courage to move forward!!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Subject: Please Approve the Ohio Solar Projects: Comment on Case No. 18-501-EL-FOR
Date: Wednesday, November 28, 2018 7:33:13 PM

Dear Public Utilities Commission of Ohio:

I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

Ms. Eileen Mehl Boelcskev
Columbus, OH

Date: Thursday, November 29, 2018 9:27:57 AM

Dear PUCO Docketing Division,

The addition of renewable energy sources is an amazing way to begin to halt the progression of climate change. I travel a lot, most recently to Churchill, Manitoba to see the polar bears. Some of them were thin due to a many years decrease in the formation of sea ice due to climate change. Sea ice is critical for them to be able to get out onto and hunt for their food. What we do here in Ohio affects our entire planet and it affects humans and animals equally. We need to decrease pollution to improve the health of all and the use of renewable energy sources will have an impact. Please pass the proposed renewable projects and add more in the future so we can impact our world for the better.

Sincerely,

Mary Ann Nelin, MD

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Wednesday, November 28, 2018 5:58:06 PM

Dear PUCO Docketing Division,

Several years ago Ohio decided to take a break from 25% in 2025. Since electricity is deregulated, I took a break from Ohio and started purchasing out of state wind energy. I've helped pay for wind farms in Texas, Nebraska, Iowa, Illinois, Indiana and Pennsylvania. I have not paid one nickel for Ohio coal or gas electricity. Ohio can do what it wants but until we get a renewable option in place, this state will never see another dime for electrical generation from me. Oh, and I saved money as well. How backward can this state be?

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Julie Rice

Date: Wednesday, November 28, 2018 2:54:05 PM

Dear PUCO Docketing Division,

As a PhD student on Environment and Natural Resources at the Ohio State University, I understand the implications -and costs- of not embracing the environmental and economic benefits of transitioning to cleaner sources of energy. Currently, solar and wind energy economies vastly outnumber other non-renewables, as sources of wealth and jobs (approx. 373.000 Americans for solar and 101.000 for wind energy vs. 160.000 for coal -source: 2017 U.S. Energy and Employment Report). Supporting the current trend is not only necessary but also the smart thing to do from a public policy perspective.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

Projects like this is what will ACTUALLY make America great again. We've let China become the world leader in renewable ebeegy investment and it might take some time, but I guarantee that we will feel the effects of that sooner rather than later. I just don't understand how there could possible be any opposition to a project like this that will create a countless number of jobs all the way down the chain of production. From design and engineer work. To manufacturing and servicing jobs. Projects like this give young parents like me hope that we can make the world a better place for our children

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Subject: Please Approve the Ohio Solar Projects: Comment on Case No. 18-501-EL-FOR
Date: Thursday, November 29, 2018 3:54:03 PM

Dear Public Utilities Commission of Ohio:

I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

Max Burkhart
Barnesville, OH
