Date: Friday, November 30, 2018 3:23:31 PM

Renewable energy for Ohio > AEP Energy is proposing to install 900 MW of solar and wind renewal energy generation capacity. This is an essential step forward in combating the detrimental health effects of burning fossil fuels and in minimizing the disruption that climate change will cause. It is in the interest of every Ohio resident for PUCO to approve these projects.

Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Sunday, December 02, 2018 8:42:30 PM

Dear PUCO Docketing Division,

I have two young children and I can't help but think about the types of challenges that they will face as a result of the neglect actions of generations before them. I am in my 30s and feel like there have been demonstrable changes in the climate in my lifetime. Also throughout my lifetime the consumption of fossil fuels and release of greenhouse gases has increased. The type of changes we need to make as a society will take decades. The change needs to start now and Ohio should be leader in the transition. The fact that AEP is proposing such impactful projects should be embraced and encouraged.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Marc Menhart

Dear PUCO Docketing Division,

Our Cincinnati Zoo has led the way with renewable energy with solar panels over the parking lot. How many parking lots could be used for both panels and parking? There are lots of ways to implement this. Even if there were no issues with pollution and climate change, why wouldn't we do whatever we could to keep our home world as clean and pristine as possible? Why would we choose pollutants when other methods are available? If the only answer to this is money, it's not a good reason.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

I very strongly believe that renewable energy is key to national energy self-sufficiency and to protecting and improving the environment and human health and safety. As someone who grew up close to both a coal plant and a nuclear plant I speak from personal experience. Vile black soot gets deposited on everything even with scrubbers and is inhaled by those in the exhaust path of coal plants causing much higher incidences of respiratory problems, acid rain damage and more. The nuclear plant I have to wonder at the safety of because everyone I knew who had a parent working there the parent experienced some form of cancer and at younger than average ages. Additionally, the evacuation radius kept getting larger until it was decommissioned.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

Please approve more green energy for our state. It is vitally important that we reduce pollution as Ohio is one of the most polluted states air quality wise, and a lot of that comes from our dirty coal power plants. This will bring jobs and economic growth as well as saving our lungs and lives. Thank you for listening to my opinion on how Ohio needs green energy!!

I'd love to see Ohio lead the way on renewables! I love in old coal country in SEOhio and we still see disastrous effects on our land and water from coal mining done long ago. I want a better future for our children and grandchildren!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Robin Thompson

Date: Sunday, December 02, 2018 8:51:46 AM

Dear PUCO Docketing Division,

Ohio should be the leader in the Midwest for renewable energy. Northern Ohio is flat and open and always windy. Wind turbines are NOT noisy and have NEVER seen any evidence of dead birds, not one freaking feather. I would rather see wind turbines any day over high tension line towers. In actuality, the high tension power lines produce more noise than wind turbines. Solar panels can also be blended in with scenery and be less damaging to the environment if done correctly, no need for a field of solar panels. Ohio needs renewable energy.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Date: Saturday, December 01, 2018 9:54:12 PM

Dear PUCO Docketing Division,

Green Energy is coming whether we like it or not. There are two paths that we as a society can take to either take advantage of this change or suffer from the disastrous consequences of inaction. Every step that we take to become a green society will help Ohio and the United States as a whole stay afloat and dominant in the world ecologically and economically. These proposed projects will create cheap energy for the state. We must take advantage of this technology now! The alternative is a world that is far more poisoned than our own. In this world, Ohio will be a sad pathetic place, using a depleting resource that is toxic. By funding projects like this, we continue Ohio's history of innovation and we are helping to save the planet. It is time for change. It is time for green energy now!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

Ohio needs to change for the Earth. Whether Global Warming is real or not, we are exhausting resources currently in use. When they run out, and they will, how will we power our homes, cook our meals, or run our businesses? Adding renewable power is a smart move because it can supplement what is currently being and continue to improve the efficiency of renewable energy and transition to renewable energy permanently.

As an asthmatic, I would appreciate the reduced toxic fumes created by coal and other resources used to create electricity.

Thank You

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Dear PUCO Docketing Division,

I think its time to move forward as long as public utilities do not try to take advantage of the people using their electrical hook up.. It seems that is what happens first, to make people feel they are getting a good deal and than ripping people off for something that is free like wind and sun. Yes it costs for equipment. I hope AEP considers what they are doing its great for people using their electricity connection but we don't need you to putting controls or charge higher down the road . Be fair and human and we will all benefit....This matters means a lot for ME AND THE AMERICAN PEOPLE , climate change getting off fossil fuels and coal AND MUCH BETTER FOR OUR OCEANS, LAND AND PEOPLE...

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

Renewable energy is the future, we should work towards making it our present.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Daniel Horton

Dear PUCO Docketing Division,

Solar power generation is a no brainer. The sun is right in front of our face everyday providing us sustainable heat. Jimmy Carter's administration had everything in place for a national solar energy program launch that was squandered. That was almost 40 years ago. We have wasted precious years continuing with unsustainable energy. Let's move forward and modernize our energy efforts before it is too late.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

I agree with the above statement. However, our leaders need to protect taxpayers from unforeseen possible expenses. In Hardin County, Ohio the citizens had an atrocious time dealing with the windmill contractor. They were rude to people and tore up County and Township roads and other infrastructure. This put burdens on taxpayers.

Be smart about clean energy and everyone will benefit. In the case of windmills, a referendum vote may be a fair way to decide if the citizens want the windmills in their area.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Date: Sunday, December 02, 2018 9:30:43 AM

Dear Public Utilities Commission of Ohio:

I'm a citizen of Ohio and I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

DOCKETING CASE #:18-0501-EL-FOR

SUBJECT: Ohio Power Company - Regarding PUCO

Please docket the attached in the case number above.

I am 100% in favor of increasing Ohio solar energy generation. With the recent Federal Climate study we know we are fighting an uphill battle to keep our environment safe for our children and grandchildren. Anytime private industry wants to lead the way is a good thing. Please get behind AEPs renewable energy proposal.

DOCKETING CASE #: 18-0501-EL-FOR

SUBJECT: Ohio Power Company - Regarding PUCO

Please docket the following comments in the case number above.

I am in favor of increasing Ohio's renewable energy. Please approve AEP's proposal for 900MW of solar and wind.

Dear Public Utilities Commission of Ohio:

I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

Miss Sherri Hickman

DOCKETING CASE #:18-0501-EL-FOR

SUBJECT: Approve American Electric Power Proposal

Please approve American Electric Power's proposal for 900MW of solar and wind energy production. This is essential to the environment as everyone knows there is no such thing as clean coal.

Please docket the customer's comment in the case number above.

Public Hearing for Renewable Energy

As a lifelong Ohioan, I am in full support of increasing sources of renewable energy in our state. Ohio cannot continue to fall behind in renewables for both economic and environmental reasons. Please approve AEPs proposed wind farms.
