

Comment on Case No. 18-0501-EL-FOR for Renewable Energy

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Joel Pokladnik

Dear PUCO Docketing Division,

Please approve AEP's plan for 900 MW of renewable energy production in Ohio. Our household made a plan in 2010 to reduce our carbon emissions by 70% by 2020. By accessing AEP's Home Energy Audit and becoming aware of lifestyle changes that are possible for us, we have reached our goal 2 years early. We had a plan and we improved the efficiency of our home, appliances, furnace, vehicles and made changes to the way we travel and the food we eat and much more. We believe the overwhelming data of climate researchers that have been working for decades to track climate changes due to greenhouse gases from human activity. Climate change due to human activity is already catastrophic. I feel very inspired by AEP's plan for 900 mW of solar and wind energy production and that a significant portion of it will enrich southern Ohio. This is what we need now to invest in Ohio's future: for people's health and for jobs and the economy. Please approve AEP's plan for 900 MW of renewable energy in Ohio. Thank you.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

**SUBJECT:** Ohio Power Company - Regarding PUCO

Please docket the attached in the case number above.

Please approve AEP's proposal for 900MW of solar and wind to facilitate the development of the largest solar energy farm in the state's history through a low, fixed-cost contract lasting 20 years. The application, if approved, would begin to meet the overwhelming demand expressed by Ohio's electricity customers for more renewable energy.

Especially with all the science backing up global warming, this is a good start to getting Ohio on the right path to making a difference..

**SUBJECT:** Ohio Power Company - Regarding PUCO

Please docket the attached in the case number above.

I am 100% in favor of increasing Ohio solar energy generation. With the recent Federal Climate study we know we are fighting an uphill battle to keep our environment safe for our children and grandchildren.

Anytime private industry wants to lead the way is a good thing. Please get behind AEPs renewable energy proposal.

Dear PUCO Docketing Division,

It only makes sense to support as many options as we have available to us. Why wouldn't traditional energy look to be a part of advancement of new technologies? Why would we want to risk everything to keep going the course? If we're wrong about the use of fossil fuels leading to environmental destruction, no harm done. If they're wrong about continued reliance on fossil fuels, the harm is done...

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

**DOCKETING CASE #: 18-0501-EL-FOR**

**SUBJECT:** PUCO - Regarding PUCO

Please docket the following comments in the case number above.

Ohio has led in many important areas over the years, but sadly we are steadily falling behind many states in leading the transition to a clean economy and renewable energy. We have an excellent solar resource in most areas of our state. We have a population of hard workers. We have too many old, polluting, fossil fuel-fired power plants. We have no excuse for not embracing the fast-growing, job-creating opportunities that renewables like solar and wind provide. Let's kickstart getting Ohio back in the game by approving this large utility solar project!

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

I am in favor of AEP being permitted to move forward with their proposed Solar and Wind project in order to (a) generate more renewable energy alternatives, and (b) generate short-term and long-term jobs. Also, the availability (or lack thereof) of renewable energy sources can influence outside companies' decisions on whether or not to set up shop in Ohio.

Respectfully,  
Roy Fish, Ph.D.
