

Public Comments, 18-0488-EL-BGN

Both me and my wife as Seneca county and eden township residents are strongly opposed to this project. Seneca County is too heavily populated for an industrial wind facility and will have negative impacts. Please consider what the majority of Seneca county and eden township residents want. Thank you.

Paul and Kathy Wise
Seneca County, Tiffin, Ohio

I am writing to you in regard to wind turbine installation in Seneca County. We are very concerned about the disruption of the ground that will take place to put these huge bases in for the turbines. Per Ohio EPA map, most of the areas around these foundations for the turbines reside in what is called "Drinking Water Protection Areas.". Foundations are said to be up to 60 ft. deep. Blasting is said to be needed for gaining attachment to bedrock to support these huge turbines. Most of your older established water wells are rather shallow in the area. Please,, Please consult with Ohio EPA or the knowledgeable entity that could tell the board of the adverse effects of disrupting the underground water system here in Seneca County. Clean water is the major entity of life, I am sure the county could not afford to install a Rural Water System if Things go wrong. Thank you, very concerned resident.
