Re: Seneca Wind, LLC
Case No. 18-488-EL-BGN

Dear Ms. McNeal:

Pursuant to Ohio Administrative Code ("OAC") Rule 4906-3-03(B)(2) Seneca Wind, LLC notifies the Ohio Power Siting Board that the attached letter (Attachment 1) was sent to each property owner and affected tenant listed on Attachment 2. The letter was sent via first class mail at least twenty-one (21) days before the April 17, 2018 community meeting with the requisite information as required by OAC Rule 4906-3-03(B)(2).

Please do not hesitate to contact me if you have any questions.

Sincerely,

Dylan F. Borchers

Re: Ohio Power Siting Board Application of Seneca Wind, LLC

For a Certificate of Environmental Compatibility and Public Need for Wind Facility

Dear Sir or Madam:

Introduction

As the attorney representing Seneca Wind, LLC (“Seneca”) before the Ohio Power Siting Board (“Board”) I am sending this letter as required by Ohio Administrative Code Rule 4906-3-03(B)(2). This letter is being sent to all abutting property owners and tenants to the project area of the proposed up to 200 megawatt (MW) wind farm to be located in Seneca County, Ohio.

You are receiving this letter because your property is contiguous to the planned project area. Ohio Administrative Code (“OAC”) Rule 4906-3-03(B)(2) requires the applicant to notify all property owners and affected tenants contiguous to the planned project area.

Because we may not have a list of tenants, I request that property owners who have leased land for the electric generating facility and who have tenants on the leased or optioned land, share this letter with them or contact me with the tenant names and addresses so that I can send them information.

Description of Facility

As you may be aware, Seneca would like to construct, operate and maintain up to a 200 MW wind farm situated in portions of Seneca County. Specifically, the site integrates approximately 25,000 acres of leased private land in Scipio, Reed, Venice, Eden, and Bloom Townships, Seneca County. The wind farm will consist of up to 70 wind turbine generators, along with access roads, electric collection cables, a substation, a laydown yard for construction staging, an operations and maintenance (O&M) facility, and two or more meteorological towers. The nameplate capacity rating of these wind turbine generators to be used ranges from 2.30 to 3.83 MW. The total generating capacity of the wind farm will not exceed 200 MW. The energy generated at the wind farm will deliver power to a single point of interconnection (POI) on the AEP Melmore 138 kilovolt (kV) transmission line. The general purpose of the project is to produce environmentally clean, reliably priced, low cost electricity to the Ohio electric marketplace.

Description of the Certification Process

In order to construct, operate and maintain the Seneca wind farm, Seneca must obtain permission from the Board. That permission is provided in the form of a Certificate.

In the near future, Seneca will submit to the Board an Application for a Certificate of Environmental Compatibility and Public Need to construct, operate, and maintain the Seneca wind farm. Once the application is submitted, the Board will preliminarily review the application to determine whether it is complete and contains all necessary requirements. No later than 60 days after the application is filed, the Chairman of the Board will notify Seneca whether the application was complete and contains all necessary requirements. The docket number which has been assigned to this matter is: Case No. 18-0488-EL-BGN.

Assuming the application is found to be complete, the Board is required to promptly fix dates for public hearings: one, a non-adjudicatory hearing to be held probably in the in a nearby location; and also an adjudicatory hearing to be held at the offices of the Public Utilities Commission of Ohio, 180 East Broad Street, Columbus, Ohio 43215-3793.

Prior to the hearings, however, the application will be reviewed by the Board staff. The review must be completed and the staff must submit a written report to the Board not less than fifteen days prior to the date of the hearings and no more than 75 days from the date the application is deemed complete. The report will set forth the nature of the investigation and contain recommended findings with regard to the criteria the Board must use to review the application. A copy of the report will be made available to any person upon request.

The criteria the Board must use to review the application are as follows:

- (1) the basis of the need for the facility;
- (2) the nature of the probable environmental impact;
- (3) that the facility represents the minimum adverse environmental impact, considering the state of available technology and the nature and economics of the various alternatives, and other pertinent considerations;
- (4) in the case of an electric transmission line, that the facility is consistent with regional plans for expansion of the electric power grid of the electric systems serving this state and interconnected utility systems and that the facility will serve the interests of electric system economy and reliability;
- (5) that the facility will comply with Chapters 3704, 3734, and 6111 of the Revised Code and all rules and standards adopted under those chapters and under Sections 1501.33, 1501.34 and 4561.32 of the Revised Code;
- (6) that the facility will serve the public interest, convenience, and necessity;

March 27, 2018

Page 3

- (7) the impact on the viability as agricultural land of any land in an existing agricultural district established under Chapter 929 of the Revised Code that is located within the site (route) and alternative site (route) of the proposed major utility facility (pipeline);
- (8) that the facility incorporates maximum feasible water conservation practices as determined by the Board, considering available technology and the nature and economics of the various alternatives.

After the public hearings are completed, recent Board practice is that the Board directs the administrative law judge who presides over the hearings to prepare a draft order for its review and consideration. The Board will issue a final decision within a reasonable time after conclusion of the hearings. If a party is not satisfied with the Board's decision, an application for rehearing can be submitted and if the Board denies the rehearing application, the party can appeal to the Ohio Supreme Court.

Parties who are interested in this application may file a petition to intervene in the adjudicatory hearing or they may ask the Board to send them notices by sending the request to the Board. Petitions to intervene will be accepted by the Board up to 30 days following the publication of the newspaper notice setting the date for the hearings, or later, if good cause is shown. However, the Board strongly encourages interested persons who wish to intervene in the adjudicatory hearing to file their petitions as soon as possible. Petitions should be addressed to the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215-3793 and cite the above-listed Case No. 18-0488-EL-BGN.

You may access all the filings in this case at the PUCO website at <http://www.puc.state.oh.us/> and then click on "Docketing Information System (DIS)"; once the Docket Information System screen appears, type the case number for the Seneca application, Case No. 18-0488-EL- BGN, and follow the instructions to retrieve copies of all filings in the case.

The Board's address is 180 East Broad Street, Columbus, Ohio 43215-3793; its telephone number is 1-866-270-6772 and its website is <http://www.opsb.ohio.gov/opsb/> and its email is. opsb@puco.ohio.gov . The applicant's website is www.senecawind.com.

Community Informational Meeting Date: Tuesday, April 17, 2018

Seneca has arranged for a public community meeting to be held on Tuesday, April 17, 2018 from 5:30 PM to 7:30 PM at the Camden Falls Reception and Conference Center located at 2460 OH-231, Tiffin, OH 44883 the Camden Falls Reception and Conference Center located at 2460 OH-231, Tiffin, OH 44883. The meeting format will be similar to an open house and stations with information about the project presented on boards held by easels that will be scattered throughout the room. Maps of the project area will be available to review. Company representatives will be near each station to answer questions. Those who attend the meeting may write comments that the applicant will summarize and include in its application.

March 27, 2018

Page 4

Conclusion

We expect that the Board will conclude, as we believe, that the Seneca wind farm will benefit the community and the region. If you have any questions you may contact John Moran of Seneca at 917-442-4574 or jmoran@spower.com.

Sincerely,

Sally W. Bloomfield
