Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Monday, January 14, 2019 9:17:42 AM

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

James Goldsberry

Dear PUCO Docketing Division,

I now have 3 grandchildren, ages 2, 1 and newborn. I worry about the world we are leaving for them, with intense storms, floods, wild fires, and air, water and soil that are polluted. Much of the contamination has come from coal and carbon based fuels used to create electricity. A solar farm is a good way for us to "repent" of our sins, while creating jobs and a new economy. We need it, BAD!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Date: Sunday, January 13, 2019 3:48:40 PM

Dear PUCO Docketing Division,

I moved my parents to assisted living here in Central Ohio. There were days when they were unable to take trips due to air quality. There has been steady improvement, but we need more of it. Nurses told me their asthma prevented them from taking people out. Childhood asthma is a serious problem in our area. Mercury from coal-fired plants pollutes our streams and contaminates our fish. PUCO can and should do more for our state, our economy (through green jobs) and our environment.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

I am very supportive of clean energy. I support wind and solar energy and also the continued operation of the two nuclear power plants in northern Ohio. I think the Sierra Club should also support the continued operation of the Perry and Davis Bease nuclear power plants because they represent 92 percent of Ohio's clean energy portfolio.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Dear PUCO Docketing Division,

I was president of The Environmental Awareness Club at Kent State University at Stark back in the early '90's, and the environment has always been important to me. Also, AEP Ohio is not only my electric service provider, they have high power transmission lines running literally through my backyard in Stark County. They are currently in the process of replacing the 100+ year old towers, beginning with a renegotiation of their right of way in 2017. The old towers are down now, and so far AEP and it's agents have proven communicative, responsible and overall "good neighbors." I am positive that if their renewable energy initiatives are approved, everyone impacted will experience that same "good neighborliness." Steven

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

Global warming is real, and the biggest cause is the use of fossil fuels for our energy needs. I'm VERY troubled for the prospects of my grandchildren and their descendants. I do not want us living today to be remembered forever as the most selfish generation in history, that knew about the problem but wouldn't lift a finger to address it. I strongly support all efforts at clean and renewable energy creation, and think Ohio should stand up and be counted!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Sunday, January 13, 2019 9:54:08 PM

Dear PUCO Docketing Division,

Ohio is behind other states and countries for implementation of renewable energy projects that would greatly benefit our economy, jobs, and health. Please act now to make up for lost time!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Mary Georgiton

Dear PUCO Docketing Division,

Having witnessed the lack of progress associated with the Buckeye Wind project in Champaign county, I am hopeful that given the current presence of AEP in Ohio power generation there might be an opportunity here that is lost in some parts of the state.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

I have heard you do not think we need this green energy solution. Yet we hear things about an ocean warming faster than predicted and more carbon in the atmosphere than ever despite all efforts worldwide to work on reducing emissions. What is the real cost of saving our planet? Help us do a just thing by allowing AEP this new power source and the minimal rate increase proposed to accomplish a green power solution.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Sunday, January 13, 2019 7:25:46 PM

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Linda Laris

Date: Sunday, January 13, 2019 7:24:27 PM

Dear PUCO Docketing Division,

It's time the US looks forward on energy policy. Let's lead the way in Ohio - green jobs and green energy. My kids are very concerned about global warming, as are my husband and I. This innovative project would be amazing!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Sunday, January 13, 2019 7:22:24 PM

Dear PUCO Docketing Division,

I was elated when I first read in the Dispatch newspaper that the AEP was going to undertake building enough renewable (solar, wind) sources of electricity to supply a proposed 900 megawatts, 400 megawatts of which was to be solar energy. I strenuously urge PUCO to allow this to go through since not only will these sources of energy reduce pollution, if built in Southern Ohio which has been undergoing difficult economic times it could provide needed jobs to the area. We need as a country to lower and eventually end our reliance on fossil fuels which contribute to pollution and our changing climate.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Date: Sunday, January 13, 2019 7:07:56 PM

Dear PUCO Docketing Division,

Aside from the environmental benefits, it just makes good economic sense. Solar in comparison to fossil fuel plants:

- 1) construction costs generally lower.
- 2) Maintenance costs are far lower.
- 3) natural resource costs (sunlight) will not increase over time.
- 4) Can be placed in more locations.
- 5) Etc., Etc.

The ability to produce large amounts of renewable energy will lead to overall higher economic benefits to those governments / entities in the near future and long term over those governments/ entities that do not make the investment.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Dear PUCO Docketing Division,

In Seneca County and adjoining counties, the wind farms planned frighten some people. Infrasound is something that would frighten anyone close to the turbines. Please research this issue. Bavaria, Quebec and Australia have setback limits of 1.24 miles from industrial turbines, 650 feet tall. This is based on a calculation of ten times the height, with the main concern the potential fragmentation of blades. The engineer did not account for infrasound, however. I favor green energy, but this is not a simple issue. Safety must take priority.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

I am in full support of more renewable energy. The earth isn't as healthy as it should be, nor are the people. Money is no good to you if you are dying from lung cancer from pollution. There are air quality alerts, something unheard of 4 generations ago. Now nobody bats an eye because they think they're safe inside their cars and homes that have air filtration. In 200 years, we have destroyed the Earth to the point that nothing in nature is fit to consume-where it should be purest. Everything needs to be filtered, this isn't how it should be. I don't care so much about the jobs, there are more jobs than people willing to work them at this time. Anyone that has a pulse can find employment. However, we can't move forward doing the same things we've always done. The earth (and sun) provide unlimited energy through wind, sunlight, and hydro-put them to use! I would even be willing to pay a premium or electricity to support this! The return on AEP's investment has to make sense, and I understand that. Investments don't matter if nobody ever steps up and makes them in the right places

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Jared Schroeder

Dear PUCO Docketing Division,

Hello PUCO, My father was an Eisenhower republican. Those are now extinct. I was on the faculty at OSU (Zoology and Natural Resources) for 30 years. Here are the facts: 1) Coal is doomed; it cannot compete. If the Democrats take over the federal government in two years the last coal fired plants will be on death watch, as they should be. 2) Solar and wind will supply many more jobs and reduce health costs caused by coal plant emissions. 3) Global warming is very real. About 97% of scientific publications verify warming caused by human production of carbon dioxide. If you took your kid to 100 doctors and 97 said to rush her to the hospital and 3 said to give her an aspirin and relax, what would you do? How stupid would you be willing to be to save a few dollars. Do you want your grandkids to be ashamed of you? A little more money now in electricity bills is no big deal compared to the alternative. Do the right thing for your state and your nation; approve the renewable energy projects. Paul C. Baumann

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Steffan Hruby

DOCKETING CASE #: 18-0501-EL-FOR

SUBJECT: Ohio Power Company - Regarding PUCO

I am writing in support of American Electric Power (AEP)'s proposed energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

I am an AEP customer and I strongly support this proposed project because it will have a tremendous impact on our economy (through jobs created and lower costs of energy bills) and will also make Ohio a leader in energy innovation. Ohio can and should be the leader in energy technology, and I am excited by this proposal to help do just that!

Thank you for taking the time to read my comment. Please support this proposed energy project for the future of Ohio and Ohioans!

Sincerely,

Coleman R. Mahler
