**Subject:** Comment on Case No. 18-0501-EL-FOR for Renewable Energy  
**Date:** Monday, February 04, 2019 12:21:33 PM

---

Dear PUCO Docketing Division,

I'm from the Cincinnati area. Ohio desperately needs this, we need to be part of progress, especially environmental progress. There is a joke about Cincinnati that you know you're home when you see the smog clouds surrounding the city. There are jokes about catching diseases if you swim in the Ohio River. These aren't funny jokes when it's actually some kind of reality. That needs to change. Please support this clean energy project, please.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Jennifer Merrill  
6211 Tanglewood Dr.  
Loveland, OH 45140

---

Dear PUCO Docketing Division,

Talk about a win/win, new jobs and after the cost of building the new solar plant is met it will be practically free energy costs in the future which may mean lower costs for consumers along with cleaner air and water. Surely no one could appose this project.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

**Subject:** Please Approve the Ohio Solar Projects: Comment on Case No. 18-501-EL-FOR  
**Date:** Wednesday, January 30, 2019 8:15:31 PM

---

Dear Public Utilities Commission of Ohio:

I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

Madeline Zglinicki  
Westerville, OH

Dear PUCO Docketing Division,

If the Sunstar shines, capture that energy. If Mother Nature moves water, capture that energy. If the wind blows, capture that energy. There is geothermal energy in the ground at your feet, wherever you are. Capture that energy. Mother Nature is already doing most of the work. These tactics in a strategy of Adaptive Response to Threatening Change in climate and weather could enable human survival, and preserve fossil fuels for far longer into the future, for uses we can't readily adapt away from. Further delays in enacting tactics in a strategy of Adaptive Response may mean, when leadership decision-makers in commerce and government finally decide Adaptive Response is demanded to enable survival, their tactics will be too-little/too-late for Threatening Change coming too-much/too-soon. Lead us up. Don't follow them down.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

**Subject:** Comment on Case No. 18-0501-EL-FOR for Renewable Energy  
**Date:** Thursday, January 31, 2019 7:10:16 PM

---

Dear PUCO Docketing Division,

Clean energy is the future. Ohio should be taking the lead on wind (and solar, geothermal) for both jobs and the environment.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Tyler Rasp

Dear PUCO Docketing Division,

It is important that we change to renewable energy as soon as possible. It might cost a little more at first, but it will save us money the long run. If we keep using fossil we will destroy the environment and Florida will be under water by the end of the century.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Dear PUCO Docketing Division,

As someone who is now vegetarian, and has had a very young cousin suffer from cancer, I think it is very important that we look for better, innovative, safe ways to produce and harness renewable energy sources. Solar panels are a great option and I think that with some problem solving skills we could come up with a way to even make them safer for wildlife (i.e birds). I know a lot of renewable energy ideas have a bit of an upfront cost, but they can and do pay for themselves over the years during operation. I believe it would be simply amazing if we can not only attempt to find better ways, but excel in saving money in the long haul, providing jobs for more of our citizens and more importantly, help to protect our planet.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

**Subject:** Comment on Case No. 18-0501-EL-FOR for Renewable Energy  
**Date:** Friday, February 01, 2019 10:38:15 PM

---

Dear PUCO Docketing Division,

This issue is important to me because many power plants are located in areas of poverty. These are people who really need clean alternatives. Hopefully jobs and training will be provided to these people, but it is also these people who suffer from respiratory problems because of toxins released into the air from present sources. These are the people who can least afford the medical care. They do not need to deal with medical concerns because of pollution. Please approve AEP's plan for clean and renewable energy.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Connie Pilkington

Dear PUCO Docketing Division,

Bring on the jobs, bring on the clean energy, Bring on our children's future. Germany has solar fields that create more jobs and more energy than a Nuclear plant. Forget the fact that that solar energy is clean energy it also comes with the added bonus or no chance for nuclear melt downs witch have such long lasting effects like Chernobyl which is to this day still NOT inhabitable!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

Dear PUCO Docketing Division,

Renewable energy is cheaper, creates jobs, and helps with climate change. Ohio should look to the future and not the past.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,
