17-2295

To Whom it May Concern:

I've lived in this area for 57 years and I've been following the Republic Wind project (Docket No. 17-2295-EL-BGN, Republic) for quite some time. I've participated in public discussions and directly interacted with the developer, Apex Clean Energy.

Apex has been accessible and responsive to questions and feedback. Overall, they have been very engaged with members of the community and are committed to protecting our legacy. As I've talked to my fellow residents, I see broad support for Republic Wind. I recognize there are some in the county who do not want wind projects. Fortunately, no one is telling them they must put a turbine on their property.

The economic, community, infrastructure and health benefits that would result from this project are hardly debatable. For these reasons I urge you to support Emerson Creek Wind.

Sincerely,

Dear Siting Board:

The Willard Board of Education met on Monday, February 11, 2019 to review the Emerson Creek Wind project information for a second time. The Board voted to adopt a neutral position for this project, which rescinds the stance taken on March 12, 2018.

Respectfully submitted,

Jeffery R. Ritz, Superintendent
Willard City Schools

Re: Republic Wind Farm (17-2295-EL-BGN)

To the members of the Ohio Power Siting Board:

The Republic Wind Farm project is a project that will benefit Ohio and support the OPSB's mission to support sound energy policy. This project will benefit Ohio citizens by providing an additional 200 MW source of renewable energy. It will promote the state's economic interests by making renewable energy – which is highly sought after by many large manufacturing and technology companies - available to families and businesses. Finally this project will serve to protect the environment by upholding the highest environmental standards during the construction and operating phases.

Further, this construction project will create hundreds of jobs during the initial construction phase, and would also create a number of full-time jobs after construction is completed. These are jobs that would give local families a paycheck, most of which would be spent right here in Northern Ohio.

The construction jobs from these types of projects are vitally important to the members of the Ironworkers Union Local 17 in Cleveland. Our members are highly trained professionals whose skillset and institutional oversight will ensure that the highest standards of quality and safety will be met. From the Golden Gate Bridge to the Stealth Fighter to the Rock and Roll Hall of Fame and Key Tower, Ironworkers have been involved in the country's most important and most iconic building projects for the US and for Ohio. We would also like to be involved in a project as important as important as Republic.

But this project is not just about benefits for workers. Local schools would also benefit greatly from these projects. Schools in Seneca and Sandusky counties are expected to receive significant tax revenue from these projects. This revenue is needed to improve teacher pay, to maintain and improve facilities and to purchase new books, computers, etc.

In short, Republic Wind would provide huge benefits to our Union but also to the state of Ohio. I strongly support this project and I hope that the OPSB does the same.

Sincerely,

Name Marquis Toler
