

**BEFORE  
THE PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Consolidated	)	
Edison Solutions, Inc. 2017 Renewable	)	Case No. 18-0674-EL-ACP
Portfolio Standard Status Report	)	

---

**Staff Findings and Recommendations**

---

**I. Statutory Background**

Amended Substitute Senate Bill 221, of the 127<sup>th</sup> General Assembly (2008 Ohio Laws S221, effective July 31, 2008), established Ohio's renewable portfolio standard (RPS) applicable to electric distribution utilities and electric service companies. The RPS is addressed principally in Ohio Revised Code (R.C.) 4928.64, with relevant resource definitions also contained within R.C. 4928.01(A).

According to R.C. 4928.64(B)(2), the compliance obligations for **2017** are as follows:

- Renewable Energy Resources = **3.50%** (includes solar requirement)
- Solar Energy Resources = **0.15%**

The Public Utilities Commission of Ohio (PUCO or Commission) further developed rules to implement the Ohio RPS, contained within Ohio Administrative Code (Ohio Adm.Code) 4901:1-40.

Ohio Adm.Code 4901:1-40-05(A), states:

Unless otherwise ordered by the commission, each electric utility and electric services company shall file by April fifteenth of each year, on such forms as may be published by the commission, an annual alternative energy portfolio status report analyzing all activities undertaken in the previous calendar year to demonstrate how the applicable alternative energy portfolio benchmarks and planning requirements have or will be met. Staff shall conduct annual compliance reviews with regard to the benchmarks under the alternative energy portfolio standard.

Ohio Adm.Code 4901:1-40-05(C), states:

Staff shall review each electric utility's or electric services company's alternative energy portfolio status report and any timely filed comments, and file its findings and recommendations and any proposed modifications thereto.

The findings and recommendations in this document pertain to the company's compliance status. This document does not address such matters as cost recovery or status relative to the statutory 3% cost provision.

## **II. Company Filing Summarized**

Consolidated Edison Solutions, Inc. (ConEd or Company) filed its RPS compliance status report for the 2017 compliance year on April 13, 2018. In its compliance filing, ConEd proposed a baseline of 296,742 megawatt-hours (MWHs) which it indicated was its Ohio retail electric sales for 2017.<sup>1</sup> Applying the statutory benchmarks to its proposed baseline, ConEd calculated its 2017 compliance obligations to be as follows:

- 445 Solar MWHs
- 9,941 Non-Solar<sup>2</sup> MWHs

The Company indicated that it had obtained the necessary renewable energy credits (RECs) and solar RECs (S-RECs) to satisfy its 2017 compliance obligations. The Company further indicated that it had transferred RECs and S-RECs to its PJM EIS Generation Attributes Tracking System (GATS) reserve subaccount for Ohio compliance purposes.<sup>3</sup>

## **III. Filed Comments**

No persons filed comments in this proceeding.

---

<sup>1</sup> ConEd sold its retail business to Constellation in 2016, with ConEd's customers transitioned to Constellation in 2017. The sales listed by ConEd for its baseline in this proceeding represent sales volumes prior to the customer migration. (Source: Company email dated Nov. 13, 2018).

<sup>2</sup> Staff uses "non-solar" in this context to refer to the total renewable requirement net of the specific solar carve-out. Staff acknowledges that there is not a specific "non-solar" requirement in the applicable statute.

<sup>3</sup> The RECs and S-RECs were retired under the account name of "Exelon Generation Co., LLC (NEV)" and cover the combined 2017 compliance obligations of ConEd and Constellation NewEnergy, Inc.

#### **IV. Staff Findings**

Following its review of the annual status report and any timely comments submitted in this proceeding, Staff makes the following findings:

- (1) ConEd was an electric services company in Ohio with retail electric sales in the state of Ohio during 2017, and therefore the Company had an RPS obligation for 2017.<sup>4,5</sup>
- (2) The baseline proposed by the Company is reasonable, and given the proposed baseline and the 2017 statutory benchmarks, ConEd accurately calculated its RPS compliance obligations.
- (3) The Company has transferred 445 S-RECs and 9,941 RECs to its GATS reserve subaccount for 2017 Ohio compliance purposes.
- (4) Following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its non-solar obligation for 2017. The RECs that the Company transferred to its GATS reserve subaccount were sourced from generating facilities certified by the Commission and were appropriately associated with electricity generated no later than December 31, 2017.
- (5) Following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its solar obligation for 2017. The S-RECs that the Company transferred to its GATS reserve subaccount were sourced from solar generating facilities certified by the Commission and were appropriately associated with electricity generated no later than December 31, 2017.

#### **V. Staff Recommendations**

Following its review of the information submitted in this proceeding and other relevant data, Staff recommends that ConEd be found to have satisfied its 2017 RPS compliance obligations.

---

<sup>4</sup> ConEd was certified to provide retail generation, aggregation, and power marketer services in Ohio for a portion of 2017; see PUCO Case No. 13-0557-EL-CRS.

<sup>5</sup> ConEd's CRES certificate expired effective April 13, 2017; see PUCO Case No. 13-0557-EL-CRS.
