Re: OPSB Case No. 14-1754-GA-BLN  
North Coast Gas Transmission, LLC  
Confidential Information

Dear Ms. McNeal:

Pursuant to Rule 4906-7-07(H) of the Ohio Administrative Code, I am submitting under seal three copies of the Confidential version of page 8 of the Letter of Notification. Page 8 contains the estimated capital costs for this project. This information is confidential and proprietary and should not be disclosed to the public. A redacted version of page 8 and a motion for protective order have been filed earlier today.

Please maintain the confidentiality of this information until such time as the Administrative Law Judge can rule upon our motion for protective order.

Thank you in advance for your consideration.

Very truly yours,

Michael J. Settineri

ANR pipeline. This station will measure and regulate the gas flow to the OCEC and will regulate the pressure from each pipeline. Gas from the ANR pipeline will be odorized by ANR. The third station will be located at the OCEC site. This station will measure the gas flow.

Several above ground valve stations will also be installed with the Oregon Lateral. The locations of these stations will be shown on the construction drawings for the pipeline. Compressor stations are not required for the transportation of the natural gas along the 22-mile route.

- **Right-of-Way (ROW) and/or Land Requirement:** Construction of the Oregon Lateral Pipeline will generally occur within a 75-foot wide easement (50-foot wide permanent easement with a 25-foot temporary easement). Additionally, roughly 15 acres of temporary easements are needed for stock piles, staging, additional construction and pipe pullback areas, and temporary access roads for the construction site.

(2) **Electric and Magnetic Fields**

This section does not apply.

(3) **Estimated Capital Costs**

The capital cost of this project is estimated to be approximately \$67,500,000.
