Emerson Creek Wind farm

Ohio Power Sitting Board

PUCO   2019 APR -9 PM 3:38   RECEIVED-DOCKETING DIV

As a resident of Peru township in Huron County and a farmland owner in Sherman township, I strongly disapprove of the **18-1607-EL-BGN Emerson Creek Wind Farm**. A wind turbine is to be located approximately a mile from my home, which is adjacent to land I own in Sherman township. Land that has been in my family for generations. The proposed wind farm will permanently lower property values, ruin the landscape and ruin friendships. Not forgetting there are bald eagles nesting in the area as well as other wildlife. I doubt very much that any of the members on the board would like a wind farm on or near your homes. Please stop the Emerson Creek Wind Farm Project.

Sincerely

Mark Bower

Comments

I do not want the wind turbines in our area. There are grateful eagles in our area. Also we are farmers and I wouldn't want to look at those giant tall turbines spoiling our peaceful winds and ruining tillable farm land up. We put our land in the Land Conservancy to preserve the natural area for generations in its present state. We also know of all the bad health problems they cause.
Thank you.

Thank you for your thoughts and insights regarding this project.

Comments

I have 700 acres of farm land with the Huron river going through it. We have 250 acres of woods. I don't want the wind turbines to screw up the wildlife and myself.

Thank you for your thoughts and insights regarding this project.
