Wind turbines cause loss of wild life. This is a migratory corridor. I will loose property value due to noise and visual loss of turbines. Loss of property value will cause us to sue or look for those interested in class action against those involved in said case, including any and all with said interest.

I'm against having these hideous turbines in my county. What do I get from these turbines?
Does my electric bill go down significantly? Does somebody get kickbacks who sits in their
office making these brilliant ideas.

It is absolutely absurd to put large turbines in populated area's. If you do your home work you will find they do interfere with Doppler radar . If you think you have the right to put people's life's at risk when storms come through , you don't . You had testimonials yesterday letting you know how many blade failures in Ohio already and the Wind companies won't even let you know. They are projecting 6lb pieces of junk almost 1700' . That would be like getting hit with a sledge hammer at what speed ? Shut down this ridiculous scam. They are not even 30% efficient of what they are rated at .

I and my wife Debra are against this wind farm. They are ugly and will ruin the beautiful horizon. It will cause my property value to down. Also I fear for the health problems that could occur to my neighbors. And i fear the circumstances could occur that these things will break down and never be removed (I've seen it happen in Thousand Oaks, CA)

Subject

Sixty 650 foot tall industrial Wind Turbines to be located in Norwich township

Do not want these 650 foot windmills next to my home! Who ever came up with this idea, doesn't care about causing our property values to decline or about our personal health! All they care about is their own greed. No one wants these placed in this township.

Margaret L. Phillips
