WDW-1 Ross Willis Direct Testimony – Case No. 12-1685-GA-AIR

## **I. INTRODUCTION**

1   **Q.    PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2   A.    My name is William Don Wathen Jr., and my business address is 139 East Fourth  
3       Street, Cincinnati, Ohio 45202.

4   **Q.    BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5   A.    I am employed by Duke Energy Business Services LLC (DEBS), as Director of  
6       Rates and Regulatory Strategy for Ohio and Kentucky. DEBS provides various  
7       administrative and other services to Duke Energy Ohio, Inc., (Duke Energy Ohio or  
8       Company) and other affiliated companies of Duke Energy Corporation (Duke  
9       Energy).

10  **Q.    PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND**  
11  **PROFESSIONAL EXPERIENCE.**

12  A.    I received Bachelor Degrees in Business and Chemical Engineering, and a Master of  
13       Business Administration Degree, all from the University of Kentucky. After  
14       completing graduate studies, I was employed by Kentucky Utilities Company as a  
15       planning analyst. In 1989, I began employment with the Indiana Utility Regulatory  
16       Commission as a senior engineer. From 1992 until mid-1998, I was employed by  
17       SVBK Consulting Group, where I held several positions as a consultant, focusing  
18       principally on utility rate matters. I was hired by Duke Energy (then Cinergy  
19       Services, Inc.), in 1998, as an Economic and Financial Specialist in the Budgets and  
20       Forecasts Department. In 1999, I was promoted to the position of Manager,  
21       Financial Forecasts. In August 2003, I was named to the position of Director - Rates.  
22       On December 1, 2009, I took the position of General Manager and Vice President of

1 Rates, Ohio and Kentucky. On July 3, 2012, as a result of the merger between  
2 Duke Energy and Progress Energy Corp., my title changed to Director of Rates  
3 and Regulatory Strategy for Ohio and Kentucky.

4 **Q. PLEASE DESCRIBE YOUR RESPONSIBILITIES AS DIRECTOR OF**  
5 **RATES AND REGULATORY STRATEGY FOR OHIO AND KENTUCKY.**

6 A. As Director of Rates and Regulatory Strategy for Ohio and Kentucky, I am  
7 responsible for all state and federal rate matters involving Duke Energy Ohio and  
8 its subsidiary, Duke Energy Kentucky, Inc.

9 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE PUBLIC**  
10 **UTILITIES COMMISSION OF OHIO?**

11 A. Yes. I have previously testified in numerous cases before the Public Utilities  
12 Commission of Ohio (Commission) and other regulatory commissions.

13 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THESE**  
14 **PROCEEDINGS?**

15 A. On December 21, 2018, Duke Energy Ohio made a filing in this proceeding,  
16 proposing to flow through to customers benefits associated with the reduction in  
17 the federal income tax (FIT) rate resulting from the Tax Cuts and Jobs Act of  
18 2017 (TCJA). My testimony begins by describing the details of the Company's  
19 proposal. Then I will discuss why the Company's proposal is reasonable and  
20 equitable, how it resolves the outstanding issues related to the Commission's  
21 orders in Case No. 18-47-AU-COI, and how it compares to the approved and  
22 pending proposals for other investor-owned utilities subject to the Commission's  
23 jurisdiction. Finally, I will respond to the specific recommendations made by

1 Commission Staff in its Staff Review and Recommendation, as filed on May 10,  
2 2019 (Staff Report).

## 3 II. BACKGROUND

3 **Q. WILL YOU SUMMARIZE THE PROPOSAL MADE BY THE COMPANY**  
4 **WHEN IT FILED ITS APPLICATION ON DECEMBER 21, 2018, IN THIS**  
5 **PROCEEDING?**

6 A. The Company filed this proposal to resolve all outstanding issues related to the  
7 impact of the TCJA on Duke Energy Ohio's retail rates for natural gas service.  
8 The Company had previously filed comments and testimony in another  
9 proceeding, Case No. 18-47-AU-COI, raising questions about the appropriateness  
10 of compelling rate reductions without providing due process to utilities.  
11 However, the Company made its filing in *this* proceeding to voluntarily  
12 implement rate reductions to reflect the lower FIT going back to the first day of  
13 the lower rate, regardless of what the Company was actually saving in income  
14 taxes.

15 The Company's proposal essentially includes three major components:

- 16 a. A reduction in base rates to reflect the impact of the lower FIT on  
17 the overall revenue requirement from the Company's last base rate  
18 case (Case No. 12-1685-GA-AIR, *et al.*)
- 19 b. A refund of dollars that have been deferred since January 1, 2018,  
20 to reflect the lower base revenue requirement calculated above.  
21 This refund is calculated as if the lower rates had been in effect on  
22 the first day the TCJA was effective. (The time between January 1,

1 2018, and the effective date of the new rates reflecting the lower  
2 FIT is called the "Stub Period.") The refund includes carrying  
3 costs on the balance of the amounts accrued through the day the  
4 refund begins flowing back to customers.

5 c. A refund of the protected (or "normalized") excess accumulated  
6 deferred income taxes (EDITs) that were included in the  
7 Company's existing base rates, amortized over a period consistent  
8 with normalization rules.

9 d. A refund of the unprotected (or "non-normalized") EDITs that  
10 were included in the Company's existing base rates, amortized  
11 over a ten-year period consistent with the Commission's previous  
12 decision in Case No. 18-1185-EL-UNC, whereby it approved a  
13 ten-year amortization of the unprotected EDITs related to electric  
14 distribution.

15 e. Implementation of a new rider to flow through to customers the  
16 Stub Period refund and the EDITs with a rate design that  
17 reasonably allocates the benefits to all rate classes.

18 The Company proposed that it would begin flowing the benefits of the TCJA back  
19 to customers on April 1, 2019; however, due to the new procedural schedule, the  
20 benefit to customers will be delayed until the Commission issues an order in this  
21 case. Customers will be no worse off, in as much as the accrual will continue over  
22 what will be a longer Stub Period.

1   **Q.   HOW DID THE COMPANY CALCULATE THE REVISED BASE**  
2   **REVENUE REQUIREMENT?**

3   A.   Using the revenue requirement model that generated the base revenue requirement  
4       approved by the Commission in Case No. 12-1685-GA-AIR, *et al.*, it is a simple  
5       matter to substitute the new FIT of 21 percent for the 35 percent figure used in the  
6       original calculation. For the most part, the revision to the FIT flows through all  
7       relevant components of the revenue requirement model. For this component of the  
8       TCJA proposal, only the impact of the FIT was addressed and none of the EDITs  
9       from that model impacted this calculation. As shown in the Application, the result  
10      of this calculation was to reduce the annualized base revenue requirement for the  
11      2012 test year from \$384,015,062 to \$371,090,178, which is a reduction of  
12      \$12,924,884.

13   **Q.   WHAT IS THE SOURCE FOR THE STARTING BASE REVENUE**  
14   **REQUIREMENT?**

15   A.   Staff witness William Ross Willis sponsored testimony in Case No. 12-1685-GA-  
16       AIR, *et al.*, that supported a stipulation reached in that case. A copy of that  
17       testimony is provided as Attachment WDW-1. Included in his testimony was a  
18       Revised Schedule A-1, showing that the test year revenue requirement agreed to  
19       by the parties to the Stipulation in that case was \$384,015,062 (including natural  
20       gas cost recovery). On page 76 of the Commission's Order in that case, the  
21       Commission explicitly approved that amount. Included in his testimony was also  
22       a Revised Schedule C-2, showing the settlement adjusted base revenue, excluding  
23       natural gas cost recovery, of \$241,326,770. To calculate the reduction in base

1 rates attributable to the lower FIT from the TCJA, the Company used the revenue  
2 requirements model that produced that approved base revenue amount.

3 **Q. WHAT IS THE COMPANY'S PROPOSAL FOR IMPLEMENTING THIS**  
4 **REDUCTION?**

5 A. Because there would be no need to modify the Company's billing system and  
6 because it is a fair and reasonable method for ensuring that all customers benefit  
7 equally from the lower FIT, the Company proposed to reduce base rates across-  
8 the-board for the lower FIT. Consequently, the Application includes revised  
9 tariffs that reflect a 5.3558 percent ( $\$12,924,884 \div \$241,326,770$ ) reduction to all  
10 base rates.

11 **Q. DOES THE CALCULATED REDUCTION IN FIT EXPENSE APPROVED**  
12 **IN THE 2012 BASE RATE CASE REFLECT THE COMPANY'S ACTUAL**  
13 **TAX SAVINGS DUE TO THE LOWER FIT?**

14 A. No. This methodology does not necessarily reflect actual tax savings. The  
15 calculation is an accurate calculation of the reduction in the income tax  
16 component of the Company's base revenue requirement for income taxes during  
17 the test year used in the last rate case, which was the twelve months ending  
18 December 31, 2012; however, the actual revenues and costs realized by the  
19 Company since the effective date of the TCJA are not necessarily the same as the  
20 revenue and costs approved in the last base rate case. Consequently, the measure  
21 of how much the Company's tax expense changed during the 2012 test year is not  
22 likely to be the same as the Company's actual tax savings in 2018 and thus far in  
23 2019.

1    **Q.    WHY DID THE COMPANY PROPOSE TO USE THE LAST BASE RATE**  
2           **CASE AS THE BASIS FOR CALCULATING THIS COMPONENT OF ITS**  
3           **PROPOSED REFUND FOR THE TCJA?**

4    A.    The last base rate case represents the most recent filing made by the Company  
5           that comprehensively reviewed the overall earnings from its natural gas  
6           distribution business. Absent a separate forum to fully review whether the  
7           Company is actually earning its approved rate of return, the revenue requirement  
8           approved in the last rate case represents the most recent fully developed analysis  
9           of the financial condition of the Company's natural gas operations. Rather than  
10          subject the Company, Staff, and intervenors to what would most likely be  
11          protracted litigation over what the Company's regulated earnings have been since  
12          the effective date of the TCJA, the Company's proposal to use the agreed-to and  
13          approved revenue requirements model from the last natural gas base rate case is a  
14          means of minimizing any controversy about the magnitude of the FIT benefit that  
15          should flow through base rates.

16   **Q.    IS THIS THE BASIS FOR CALCULATING THE DEFERRALS DURING**  
17          **THE STUB PERIOD?**

18   A.    Yes. Beginning with activity for January 2018, the Company has been accruing a  
19          deferral for the difference between the actual base revenue it has been collecting  
20          and what it would have been collecting if the lower FIT rate had been used to  
21          calculate existing base rates.

1    **Q.    WERE BASE RATES THE ONLY REVENUE SOURCE THAT WAS**  
2    **IMPACTED BY THE LOWER FIT?**

3    A.    No. The Company has two riders, one for its gas SmartGrid, Rider AU, and one  
4    for its accelerated main replacement program, Rider AMRP, both of which, for  
5    the first few months of 2018, were collecting revenue at rates that did not reflect  
6    the lower FIT. Beginning in April 2018 for Rider AU, and in May 2018 for Rider  
7    AMRP, the lower FIT was reflected in the revenue requirement calculations for  
8    these two riders. Up until that time, the Company recorded additional deferrals to  
9    refund the difference in revenue requirements owing to the reduction in the FIT.

10   **Q.    WHAT IS THE CURRENT BALANCE OF THE DEFERRAL FOR THE**  
11   **STUB PERIOD?**

12   A.    As of June 30, 2019, the amount recorded by the Company for the Stub Period is  
13   \$21,416,539, excluding any carrying costs. The Company's Application proposed  
14   to include carrying charges calculated at the long-term debt rate from the most  
15   recent natural gas base rate case. Adding carrying charges, the total refund  
16   amount proposed by the Company, as of June 30, 2019, is \$22,325,988.

17           The ultimate amount to be refunded will not be known until the  
18   Commission concludes this proceeding. In any event, the Company will continue  
19   accruing the deferral, with carrying charges, until the Company's revenue is  
20   adjusted for the lower FIT.

21   **Q.    DESCRIBE THE COMPANY'S PROPOSAL TO REFUND EDITS.**

22   A.    The Company is proposing to create a rider, Rider GTCJA, to refund 100 percent  
23   of the EDITs that were included in the Company's most recent natural gas rate

1 base as of March 31, 2012, the date certain in that case. Rider TCJA will flow  
2 through to customers both protected and unprotected EDITs, grossed up by the  
3 prevailing income tax, by means of a credit on their bills. The Company is  
4 proposing to amortize the protected EDITs using the average rate assumption  
5 method (ARAM), so as not to violate any normalization rules, and to amortize the  
6 unprotected EDITs over ten years.

7 **Q. WHY IS THE COMPANY PROPOSING TO USE THE EDITs BASED ON**  
8 **THE RATE BASE THAT WAS APPROVED IN THE MOST RECENT**  
9 **NATURAL GAS BASE RATE CASE?**

10 A. There are several reasons for using the last natural gas base rate case as basis for  
11 calculating the refund obligation associated with the impact of the TCJA on  
12 accumulated deferred income taxes (ADITs). First, the magnitude of the ADITs  
13 included in the rate base underlying Company's existing base rates is known as a  
14 result of a full rate case where the entirety of the Company's cost of service and  
15 revenue requirement was completely vetted, agreed to by the parties to the case,  
16 and ultimately approved by the Commission. There is no controversy about how  
17 much deferred taxes are included in base rates. Revised Schedules B-1 and B-6  
18 included in the testimony of Staff witness Willis,<sup>1</sup> and in the Staff Report filed  
19 that case,<sup>2</sup> clearly detail the ADIT balances approved in the Company's existing  
20 base rates.

---

<sup>1</sup> *In the Matter of the Application of Duke Energy Ohio, Inc., for an Increase in Gas Rates*, Case No. 12-1685-GA-AIR, *et al.*, Pre-filed Testimony of Wm. Ross Willis, in Support of Joint Stipulation and Recommendation (April 22, 2013) (included as Attachment WDW-1).

<sup>2</sup> *Id.*, A Report by the Staff of the Public Utilities Commission of Ohio, Duke Energy Ohio, Inc. (January 4, 2013).

1           The second reason is related to the first. There is no reason to dispute the  
2           magnitude of the ADITs included in base rates as this issue was one component of  
3           the revenue requirement that was agreed to and approved by the Commission. On  
4           the other hand, using another date, such as balances as of December 31, 2017,  
5           would require speculation and numerous assumptions. For instance, some of the  
6           deferred tax balances that existed on December 31, 2017, relate to certain  
7           regulatory assets for which recovery is being disputed by Staff and other parties.  
8           One regulatory asset on the Company's balance sheet on December 31, 2017,  
9           relates to costs the Company has been allowed to defer, namely, environmental  
10          investigation and remediation costs associated with the its former manufactured  
11          gas plants (MGP).<sup>3</sup> When the actual incurred MGP costs are deferred for future  
12          recovery there is an expense for calculating the Company's current income tax  
13          that is not, at that time, recorded for calculating the Company's book expense.  
14          Consequently, the deferral of actual MGP costs creates a deferred income tax.  
15          The Company has multiple filings before the Commission seeking recovery of its  
16          MGP costs going back to expenses incurred since January 1, 2013.<sup>4</sup> As of  
17          December 31, 2017, there was an accumulated deferred income tax associated  
18          with the deferred MGP costs incurred up to that date.

---

<sup>3</sup> *In the Matter of the Application of Duke Energy Ohio, Inc., for Authority to Defer Environmental Investigation and Remediation Costs*, Case No. 09-712-GA-AAM, Finding and Order (November 12, 2009), pg. 4; *In the Matter of the Application of Duke Energy Ohio, Inc., for an Increase in its Natural Gas Distribution Rates*, Case No. 12-1685-GA-AIR, *et al.*, Opinion and Order (November 13, 2013), pp. 70-74 (hereinafter the Commission's Order); *In re the Matter of the Application of Duke Energy Ohio, Inc. for Authority to Defer Environmental Investigation and Remediation Costs*, Case No. 16-1106-GA-AAM, *et al.*, Finding and Order (December 21, 2016), pg. 1.

<sup>4</sup> The first such filing for calendar year 2013 costs was made on March 31, 2014, in Case No. 14-0375-GA-RDR, *et al.* The second such filing for calendar year 2014 costs was made on March 31, 2015, in Case No. 15-0452-GA-RDR, *et al.* The third such filing for calendar year 2015 costs was made on March 31, 2016, in Case No. 16-0542-GA-RDR, *et al.* The fourth such filing for calendar year 2016 costs was made on March 31, 2017, in Case No. 17-596-GA-RDR, *et al.* The fifth such filing for calendar year 2017 costs was made on March 28, 2018 in Case No. 18-283-GA-RDR, *et al.*

1           In its Staff Review for the cases involving MGP costs for 2013 through  
2           2017, Staff recommended a disallowance of nearly \$12 million. A portion of the  
3           total ADIT balance that existed on December 31, 2017, relates to the \$12 million  
4           of deferred MGP cost that Staff recommends the Company not recover. The  
5           excess deferred income tax associated with the amounts Staff is recommending be  
6           disallowed is approximately \$1.7 million (\$12 million x (35% - 21%)). It would  
7           be completely unreasonable for the Company to be required to refund the income  
8           tax benefit for an expense it may not be allowed to recover from customers. In  
9           other words, if the Commission accepts Staff's recommendation to disallow \$12  
10          million in MGP costs, then it would be inequitable to give customers the benefit  
11          of refunding deferred income taxes related to an expense they will not have to pay  
12          for. If shareholders are required to bear the burden of an expense, then  
13          shareholders should benefit from any tax benefits generated by that expense.

14          There are other deferred income taxes from the December 31, 2017,  
15          balance sheet that are also related to deferrals for which recovery is not yet  
16          approved. Unless and until those deferrals are ultimately approved for recovery, it  
17          is unreasonable for customers to receive a benefit related to any cost they are  
18          ultimately not going to pay through rates. Using the rate base approved in the last  
19          base rate case eliminates any controversy about determining how much of the  
20          December 31, 2017, deferred tax balance should be refunded to customers. The  
21          balance approved in the last base rate case is the amount included in base rates  
22          and factually is the amount that customers are paying.

1           The third reason for using the balances of ADITs as the basis for  
2           refunding EDITs is that this proposal has already been agreed to by Staff and the  
3           Ohio Consumers' Counsel (OCC), and approved by the Commission, in a  
4           proceeding involving Columbia Gas of Ohio (Columbia Gas). In as much as there  
5           was consensus among the parties to use the date certain from the last base rate  
6           case in the case settling the TCJA matter for Columbia Gas,<sup>5</sup> and because it was  
7           approved by the Commission, it must be a reasonable approach. To suggest that it  
8           is not a reasonable approach would mean that the parties in the Columbia Gas  
9           case recommended an unreasonable basis for calculating EDITs and the  
10          Commission approved an unreasonable outcome.

11   **Q.   HOW DID DUKE ENERGY OHIO DETERMINE THE REFUND**  
12   **OBLIGATION FOR DEFERRED TAXES FOR ITS ELECTRIC**  
13   **DISTRIBUTION BUSINESS?**

14   A.   The circumstances related to the Company's resolution of the TCJA issues for its  
15          electric distribution business were quite different than for its gas business.  
16          Specifically, at the time of the passage of the TCJA, the Company had a pending  
17          electric distribution base rate case before the Commission. That case was still  
18          pending when the Company filed its proposal to address the TCJA impacts on its  
19          electric business in Case No. 18-1185-EL-UNC, *et al.* At the time of that filing,  
20          the Company had already reached a stipulation with several parties in its electric  
21          distribution base rate case, Case No. 17-32-EL-AIR, *et al.* That stipulation  
22          included an agreement on the base revenue requirement, which, in turn, meant

---

<sup>5</sup> *In the Matter of the Application of Columbia Gas of Ohio, Inc. for Approval of an Alternative Form of Regulation*, Case No. 17-2202-GA-ALT, Stipulation and Recommendation, pg. 3 (October 25, 2018); and Opinion and Order, pg. 9 (November 28, 2018).

1 agreement on the magnitude of the deferred taxes included in base rates at the  
2 date certain in that rate case.

3 When the Company filed its application in Case No. 18-1185-EL-UNC,  
4 there was no other approved model for addressing the TCJA impacts on base rates  
5 and, in the seeming absence of a superior alternative, the December 31, 2017, date  
6 was used. Since that time, the Commission approved the Columbia Gas approach,  
7 which is a more sensible approach and is less vulnerable to disputes over which  
8 deferred taxes are owed to customers.

9 **Q. IS THE COMPANY'S PROPOSAL FOR REFUNDING DEFERRED**  
10 **TAXES CONSISTENT WITH THE MODEL FOR COLUMBIA GAS?**

11 A. It is essentially the same proposal that was agreed to by Staff and OCC, and  
12 ultimately approved by the Commission.

13 **Q. DESCRIBE THE ALLOCATION AND RATE DESIGN ELEMENTS OF**  
14 **THE COMPANY'S PROPOSAL.**

15 A. As I discussed earlier, the simplest method for reflecting the impact of the lower  
16 FIT on natural gas base rates is to simply adjust base rates across the board. This  
17 avoids the need for implementing any administratively burdensome, time-  
18 consuming, and potentially costly changes to the Company's billing system. It is  
19 reasonable in that it allocates the benefit evenly across all rate classes based on  
20 their relative base revenues as allocated in the prior rate case.

21 The Company's proposal for refunding the FIT benefit during the Stub  
22 Period and the EDITs is to create a new rider, Rider GTCJA. The Company  
23 proposes to allocate the total refund amount for any given year in proportion to

1 the overall base revenues from the last base rate case, which is effectively the  
2 same allocation as with the reduction to base rates discussed earlier.

3 The Company is proposing to implement Rider GTCJA as a per bill credit  
4 for all customers except for Interruptible Transportation (IT) customers. For IT  
5 customers, the credit would be in the form of a credit per hundred cubic feet of  
6 usage.

7 **Q. ARE THE COMPANY'S PROPOSALS FOR ALLOCATING THE TCJA**  
8 **BENEFITS AND FOR RATE DESIGN REASONABLE?**

9 A. Yes. The Company's proposal is the simplest to implement and ensures that all  
10 customers receive the benefit of the TCJA. In addition, flowing through the  
11 impact of the lower FIT on base rates by simply adjusting base rates is also  
12 consistent with the method approved in the Columbia Gas case. There is no  
13 rational basis for deviating from this Commission-approved method for adjusting  
14 base rates.

15 **Q. IN YOUR OPINION, DOES THE COMPANY'S PROPOSAL SATISFY**  
16 **THE COMMISSION'S DIRECTIVES AS OUTLINED IN ITS ORDERS IN**  
17 **CASE NO. 18-47-AU-COI?**

18 A. Yes. Through its orders and in statements made during the Commission's weekly  
19 meetings, it was made clear that the Commission's intent is that "benefits  
20 resulting from the TCJA will be returned to customers."<sup>6</sup> As it relates to electric  
21 service, the Company has already satisfied that mandate and it is currently  
22 providing customers all of the benefits associated with the TCJA. The Company's

---

<sup>6</sup> *In the Matter of the Commission's Investigation of the Financial Impact of the Tax Cuts and Jobs Act of 2017 on Regulated Ohio Utility Companies*, Case No. 18-47-AU-COI, Finding and Order, pg. 16 (October 24, 2018).

1 application in this proceeding includes a proposal that accomplishes the same  
2 outcome for its natural gas business.

3 **Q. HAS THERE BEEN A STANDARDIZED APPROACH TO ADDRESSING**  
4 **THE TCJA IMPACTS FOR OHIO'S REGULATED UTILITIES?**

5 A. No. The various utilities have unique circumstances that would preclude a one-  
6 size-fits-all approach. Some utilities had pending rate cases when the TCJA was  
7 enacted. Some utilities filed cases very soon after the TCJA was enacted but  
8 before the Commission had fully vetted the issues. For some utilities, the TCJA  
9 matters were essentially consolidated with other ongoing cases. The point is that  
10 there is no "one-size-fits-all" approach to address the TCJA impacts. The  
11 Commission itself recognized this in its Finding and Order in Case No. 18-47-  
12 AU-COI when it noted that "[t]he Commission agrees with the overwhelming  
13 majority of comments that stress a generalized, 'one-size-fits-all' approach would  
14 be inappropriate to address all of the issues raised by the TCJA."<sup>7</sup> However,  
15 where circumstances are comparable between utilities, the approved resolutions of  
16 the issues should similarly be comparable. Differential treatment must be based  
17 on identifiable, factual differences.

18 **Q. WHAT IS THE STATUS OF THE CASES INVOLVING THE TCJA**  
19 **IMPACTS FOR THE MAJOR UTILITIES?**

20 A. According to information on the Commission Docketing Information System, all  
21 of the major utilities have at least fulfilled the requirement to make a filing for  
22 how to address the TCJA impacts. As of the date of this filing, Ohio Power, Duke  
23 Energy Ohio, and all of the FirstEnergy Ohio electric distribution utilities have

---

<sup>7</sup> Id., pg. 17.

1 implemented Commission-approved settlements to flow through all of the  
2 benefits of the TCJA to electric customers. Collectively, the different ways in  
3 which the utilities have proceeded illustrate the impracticality of attempting a  
4 “one-size fits all” approach.

5 Dayton Power and Light (DP&L) resolved certain aspects of the TCJA in  
6 its recent electric distribution rate case (Case No. 15-1830-EL-AIR, *et al.*) and  
7 made a subsequent filing in Case No. 19-572-EL-UNC to resolve the remaining  
8 issues. DP&L’s case remains pending but there are significant differences  
9 between DP&L’s proposed resolution and those of other utilities, again  
10 underscoring the Commission’s observation that there is no “one-size-fits-all”  
11 approach.

12 For Ohio’s investor-owned gas utilities, Columbia Gas and Ohio Gas are  
13 the only major local distribution companies (LDCs) that have approved TCJA  
14 proposals. Dominion East Ohio Gas (Dominion) and Duke Energy Ohio (Gas)  
15 modeled their respective TCJA proposals after the Columbia Gas proposal that  
16 was approved by the Commission.<sup>8</sup> Dominion, Columbia, and Duke Energy Ohio  
17 have an important characteristic in common: none of these utilities has been in for  
18 a rate case for several years. On the other hand, Vectren Energy Delivery of Ohio  
19 (Vectren) filed an application to increase its base rates on March 30, 2018.<sup>9</sup>  
20 Vectren filed a separate case to address the TCJA impacts not already addressed

---

<sup>8</sup> *In the Matter of the Application of The East Ohio Gas Company d/b/a Dominion Energy Ohio Regarding Implementation of the Tax Cuts and Jobs Act of 2017*, Case No. 18-1908-GA-UNC, *et al.*, Application (December 31, 2018).

<sup>9</sup> *In the Matter of the Application of Vectren Energy Delivery of Ohio, Inc. for Approval of an Increase in Gas Rates*, Case No. 18-298-GA-AIR, *et al.*, Application to Increase Rates and Charges (March 30, 2018).

1 in the base rate in Case No. 19-29-GA-UNC.<sup>10</sup> Both Vectren cases are still  
2 pending as of the date of this filing. Finally, for Ohio Gas, it too was in the midst  
3 of a base rate case when the TCJA was implemented. The Commission approved  
4 the Ohio Gas rate case, settling some of the TCJA issues, but required the  
5 company to file a separate case to address the refund of the Stub Period and the  
6 refund of EDITs. Ohio Gas proposed that it be required to make no refunds of  
7 either the FIT savings during the Stub Period or any of its EDITs, in exchange for  
8 forgoing any future benefit of the increase in rate base associated with the  
9 amortization of the EDITs. The Commission approved that proposal, which is  
10 significantly different than any other proposal in that Ohio Gas shareholders are  
11 allowed to keep all of the TCJA benefits not flowing through base rates in  
12 exchange for future rate concessions.<sup>11</sup>

13 For natural gas utilities regulated by the Commission, these are the only  
14 ones that qualify as “major” (*i.e.*, more than 30,000 customers).<sup>12</sup>

15 **Q. WHAT CAN ONE CONCLUDE FROM THESE CASES?**

16 A. First, there is no consistent established precedent for addressing the TCJA issues,  
17 which is compounded by the uniqueness of the circumstances for each utility. As  
18 of the date of this filing, the proposals by Ohio Power and Duke Energy Ohio  
19 have been approved by the Commission to fully address the TCJA matters for  
20 electric customers. On July 17, 2019, the Commission approved a settlement for

---

<sup>10</sup> *In the Matter of the Application of Vectren Energy Delivery of Ohio, Inc. for Approval of a Tax Savings Credit Rider*, Case No. 19-0029-GA-ATA, Application (January 7, 2019).

<sup>11</sup> *In the Matter of the Application of Ohio Gas Company for a Waiver of Orders Related to the Tax Cuts and Jobs Act of 2017*, Case No. 18-1903-GA-WVR, Stipulation and Recommendation (April 25, 2019), pg. 6; Opinion and Order, pg. 5 (June 19, 2019).

<sup>12</sup> Gas utilities with fewer than 30,000 customers are defined as “small” in the Commission’s rules. O.A.C. 4901-7-01.

1 FirstEnergy that also resolves issues spanning several cases, including the TCJA  
2 matters. However, as noted above, the unique circumstances for FirstEnergy  
3 meant that resolution of its TCJA matter differed from the resolutions for Duke  
4 Energy Ohio's electric business and for Ohio Power. As noted above, the proposal  
5 for DP&L remains pending before the Commission. For the major gas utilities,  
6 only Columbia Gas and Ohio Gas have Commission-approved proposals to fully  
7 address the TCJA impacts. Dominion and Duke Energy Ohio, having the most in  
8 common with Columbia Gas, made proposals mirroring the Commission-  
9 approved proposal for Columbia Gas.

10 Although there is no "one-size-fits-all" approach for all of the utilities in  
11 the state, there is ample reason to seek consistency among those utilities who are  
12 similarly situated. Consequently, the approach that the Commission should take  
13 for Duke Energy Ohio (and for Dominion) is to be consistent with the approach  
14 taken for Columbia Gas. It is irrational to assert that the Columbia Gas model is  
15 reasonable for Columbia Gas but not for Duke Energy Ohio and Dominion, when  
16 all three of these utilities are so similarly situated. There is no meaningful  
17 difference in the circumstances for these three utilities to justify a different  
18 approach for one.

### **III. STAFF RECOMMENDATIONS**

1        ***Reduction in Ongoing Base Rates***

2        **Q.    DOES STAFF AGREE WITH THE COMPANY'S PROPOSAL TO**  
3        **MODIFY BASE RATES TO REFLECT THE LOWER FIT RATE?**

4        A.    No. Staff is recommending that, instead of reducing the base rates across-the-  
5        board by 5.3558 percent, the Company should leave base rates unadjusted and  
6        apply a 5.3558 percent discount through the Company's proposed Rider GTCJA.

7        **Q.    IS STAFF'S PROPOSAL REASONABLE?**

8        A.    No. It is not clear what problem Staff is trying to solve with this proposal as the  
9        impact on customers is exactly the same. The impact on the Company, however,  
10       is not exactly the same. While it would be a trivial exercise to simply adjust base  
11       rates without any major adjustments to the billing system, Staff's proposal would  
12       place additional administrative and financial burden on the Company by requiring  
13       significant changes to its billing system, without providing any incremental  
14       economic benefit to the customer. Additionally, it would be impossible for the  
15       Company to include this base rate reduction in its proposed Rider GTCJA. The  
16       Company cannot simply add this credit to its proposed Rider GTCJA because the  
17       rate design is different than what is being proposed in Rider GTCJA. The  
18       Company is proposing to implement Rider GTCJA as a per-bill credit for all  
19       customers except for Interruptible Transportation (IT) customers. For IT  
20       customers, the credit would be in the form of a credit per hundred cubic feet of  
21       usage. To accommodate Staff's recommendation, the Company would have to  
22       create two separate riders. This seems unnecessarily burdensome as opposed to

1 the Company's original proposal of a percentage reduction to existing tariffs.  
2 There is no rational basis for adding this burden to the Company when it adds no  
3 benefit to the customer. It also has the potential to add confusion for customers as  
4 there will be multiple components on their bills to reflect the impact of one event.

5 Furthermore, it is inexplicable why Staff would agree to adjusting base  
6 rates for this component in the Columbia Gas case but recommend something  
7 different for Duke Energy Ohio. There is no meaningful difference in the  
8 circumstances for these companies on this issue; so, the fair and reasonable  
9 solution is to accept the Company's proposal to adjust base rates, just like Staff  
10 agreed to in the Columbia Gas case.

11 ***Refund of FIT Benefit for the Stub Period***

12 **Q. WHAT IS STAFF'S RECOMMENDATION FOR REFUNDING THE FIT**  
13 **BENEFIT DURING THE STUB PERIOD?**

14 A. First, it should be noted that Staff did not appear to take exception to the  
15 Company's calculation. For the total dollars to be refunded for the FIT savings  
16 during the Stub Period, Staff is proposing to amortize the total amount over a  
17 twelve-month period beginning with the effective date of Rider GTCJA.

18 **Q. IS THAT PROPOSAL ACCEPTABLE TO THE COMPANY?**

19 A. Yes. It is consistent with Duke Energy Ohio's initial proposal.

20 **Q. IS THERE AN ALTERNATIVE THAT THE COMMISSION SHOULD**  
21 **CONSIDER?**

22 A. Because the Company is continuing to accrue this deferral and because the  
23 implementation of Rider GTCJA is not likely to begin earlier than the fall of

1 2019, Duke Energy Ohio is willing to extend the amortization period over two  
2 years instead of one. Customers will get the same amount of the refund but  
3 spreading it out over two years will extend the benefit of lower rates for a longer  
4 period. Spreading the benefit over a longer period will also mitigate some rate  
5 volatility. Rates will drop significantly when this refund is flowed through Rider  
6 GTCJA and will rise by an equal amount when the refund is fully returned to  
7 customers. Spreading the refund out over a longer period will mean a smaller rate  
8 reduction initially but it will also mean a smaller rate increase when the refund  
9 obligation ends.

10 The Company offers this as an alternative for the Commission to consider,  
11 but any amortization period of at least one year is acceptable.

12 *Excess Accumulated Deferred Income Taxes*

13 **Q. IS STAFF RECOMMENDING THAT THE APPROACH FOR DUKE**  
14 **ENERGY OHIO BE CONSISTENT WITH THE APPROACH APPROVED**  
15 **FOR COLUMBIA GAS?**

16 **A.** No. Without explanation, Staff simply asserts that, instead of using the deferred  
17 tax balances as of the date certain in the last rate case, as it agreed to in the  
18 Columbia Gas case, Duke Energy Ohio should be required to use the December  
19 31, 2017, balance of deferred taxes as the basis for the amount to be refunded to  
20 customers. (It made the same recommendation in Dominion's TCJA case, again  
21 contradicting what the Commission approved and Staff agreed to in the Columbia  
22 Gas TCJA case).

1    **Q.    IS STAFF'S APPROACH REASONABLE?**

2    A.    It is not reasonable to require Duke Energy Ohio to use the December 31, 2017,  
3           balance of deferred taxes as the basis for the amount to be refunded. This is  
4           because some of the deferred income taxes on the balance at that date relate to  
5           deferred expenses for which recovery is still uncertain. It is simply impossible to  
6           determine with certainty today how much of the deferred tax balances as of  
7           December 31, 2017, will ultimately be owed to customers. With respect to most  
8           of the deferred tax balance, Staff's approach is not unreasonable, but Staff's  
9           approach fails to account for these uncertainties. Thus, the virtue of using the  
10          balances from the date certain in the last rate case is that there is no question  
11          about whether or not these deferred taxes are included in base rates.

12   **Q.    EXPLAIN WHY UNCERTAINTY ABOUT THE RECOVERY OF**  
13       **DEFERRED EXPENSES IMPACTS THE AMOUNT OF DEFERRED**  
14       **INCOME TAXES OWED TO CUSTOMERS?**

15   A.    The Company's balance sheet as of December 31, 2017, includes a number of  
16       regulatory assets. In many cases, the Commission allows its regulated utilities to  
17       record deferrals of certain expenses it incurs and will decide at a later date  
18       whether recovery is ultimately allowed. A noteworthy example is the Company's  
19       costs related to the MGP investigation and remediation. Pursuant to Commission  
20       approval, Duke Energy Ohio deferred expenses it incurred related to MGP  
21       investigation and remediation expenses from 2013 through 2017. The expense  
22       reduced the Company current income tax liability but, because it was deferred for

1 “book” purposes, it did not reduce the Company’s book tax liability. Therefore,  
2 this difference in the treatment for tax for book created a deferred tax.

3 In several pending cases before the Commission related to recovery of the  
4 deferred MGP costs, Staff is recommending against recovery of a significant  
5 portion of the MGP deferral and, if the Commission accepts Staff’s  
6 recommendations, the deferred taxes related to the deferred MGP costs would not  
7 be owed to customers. There are other regulatory assets related to the deferred  
8 taxes on the December 31, 2017, balance sheet for which the Commission has not  
9 yet made a determination regarding recovery. The MGP deferral is just one  
10 example but it highlights the uncertainty associated with the December 31, 2017,  
11 figure, as opposed to the known quantity associated with the date certain in the  
12 last approved rate case.

13 If the Commission ultimately accepts Staff’s recommendation here to use  
14 December 31, 2017, deferred tax balances as the basis for refunding EDITS, there  
15 must be some mechanism available to the Company to ensure that any refund  
16 obligation is reduced if the origin of the deferred income tax is related to a  
17 regulatory asset that is ultimately disallowed by the Commission.

18 **Q. DID STAFF RECOMMEND ANY CHANGES TO THE COMPANY’S**  
19 **PROPOSAL FOR AMORTIZING THE EDITS?**

20 **A.** Staff recommended the same amortization period for the protected EDITS but  
21 recommended an amortization period of only six years for the unprotected  
22 EDITS. Six years is a significantly shorter amortization period than the ten-year  
23 period proposed by the Company and what the Commission previously approved

1 for the Company's electric operations. Because the Company is a combination  
2 natural gas and electric utility, and a significant portion of its customers are  
3 combination natural gas and electric customers, for ease of administration alone,  
4 the Company believes the two amortizations should be aligned at ten years.  
5 Additionally, some of the EDITs relate to assets that are common to both electric  
6 and natural gas. For 2017, 36.14 percent of Common Plant is allocated to Duke  
7 Energy Ohio's natural gas business and 63.86 percent is allocated to the  
8 Company's electric business (including both transmission and distribution).  
9 Because the EDITs at issue are based on December 31, 2017, balances this is how  
10 EDITs related to Common Plant are allocated. It does not seem rational to  
11 amortize 36.14 percent of an EDIT related to Common Plant at six years, as  
12 proposed by Staff, and the remaining 63.86 percent of the same EDIT over ten  
13 years, as the Commission already approved in Case No. 18-1185-EL-UNC.

14 **Q. IS THE COMPANY WILLING TO ACCEPT STAFF'S PROPOSED SIX-**  
15 **YEAR AMORTIZATION PERIOD FOR UNPROTECTED EDITS?**

16 A. Yes. Although the Company believes it would be more appropriate to keep  
17 symmetry with the ten-year amortization period already approved for its electric  
18 business, Duke Energy Ohio is willing to accept Staff's recommendation in the  
19 spirit of compromise.

20 ***Rider AU and AMRP***

21 **Q. DESCRIBE STAFF'S RECOMMENDATION RELATED TO RIDERS AU**  
22 **AND AMRP.**

23 A. Although Staff recommended that the December 31, 2017, balances of deferred

1 income taxes be used as the basis for calculating the EDIT refund obligation, Staff  
2 confuses its recommendation here with the approach taken for Columbia Gas. If  
3 the Company is required to refund all EDITs based on the balance sheet from  
4 December 31, 2017, via Rider GTCJA, there are no more EDITs to flow through  
5 Riders AU and AMRP. Consequently, Staff's recommendation to segregate the  
6 EDITs associated with Riders AMRP and AU from the EDITs in base rates is  
7 inappropriate. First, the EDITs in "base rates" are the EDITs from the date certain  
8 the base rate case. The deferred income taxes as of December 31, 2017, are not  
9 necessarily in existing base rates. The reason the Company proposed to segregate  
10 the EDITs associated with Riders AMRP and Rider AU is that the current revenue  
11 requirement for those riders is based on capital additions made since the date  
12 certain in the last rate case. Because the Company proposed to use the deferred  
13 income tax balances from the last base rate, it must separately account for the  
14 impact of the TCJA on the deferred taxes included in Riders AU and AMRP that  
15 include activity that occurred since that time. That is the same approach taken in  
16 the Columbia Gas case because it has two similar riders.

17 On the other hand, there will be no need to complicate the Rider AU and  
18 AMRP filings if the Commission accepts Staff's recommendation to use  
19 December 31, 2017, deferred income tax balances, because all of the EDITs owed  
20 to customers would already be fully accounted for in Rider GTCJA.

21 Whether the Commission accepts the Company's proposal to be consistent  
22 with the proposal it already approved for Columbia Gas or Staff's new position,  
23 reversing what it previously accepted, both Rider AU and Rider AMRP will

1 continue to reflect the balance of unamortized EDITs as an offset to rate base.

2 *Gross Up EDITs for Income Taxes*

3 **Q. DESCRIBE THE PROCESS OF GROSSING UP THE EDIT**  
4 **AMORTIZATION?**

5 A. Because the actual amortization of EDIT reduces tax expense, the revenue  
6 equivalent of the amortization expense is the actual amortization multiplied by the  
7 gross revenue conversion factor, essentially  $(1 \div (1 - \text{prevailing tax rate}))$ .

8 **Q. IS THE COMPANY PROPOSING TO CREDIT CUSTOMERS WITH THE**  
9 **EDIT AMORTIZATION GROSSED UP FOR INCOME TAXES?**

10 A. Yes. Staff also made this recommendation in its Staff Report.

11 *Rate Design*

12 **Q. IS STAFF'S RECOMMENDATION FOR RATE DESIGN FOR THE EDIT**  
13 **REFUND AND FOR REFUNDING THE SAVINGS DURING THE STUB**  
14 **PERIOD CONSISTENT WITH THE PROPOSAL MADE BY THE**  
15 **COMPANY?**

16 A. Yes. The proposal included in the Company's Application to allocate the benefit  
17 from amortizing the EDITs and from the Stub Period refund is consistent with  
18 Staff's recommendation in its Staff Report. Each rate class will be allocated a  
19 share of the benefits based on the percentage of revenue from base rates as  
20 reflected in the most recent Commission-approved base rate case. All customers,  
21 except customers on Duke Energy Ohio's Interruptible Transportation (IT) rate,  
22 will see a credit on their bills as a fixed amount per bill, identified as Rider  
23 GTCJA. For Rate IT, the credit will be on a volumetric (\$/CCF) basis. The rates

1 will be updated at least annually to reflect the changes in the EDIT amortization,  
2 the discontinuation of the credit for the Stub Period refund, and for any annual  
3 true-ups needed as I will address next. The billing determinants to be used for the  
4 rate calculations will be the billing determinants from the then-most current Rider  
5 AMRP or, if Rider AMRP is no longer in effect, the Company will propose some  
6 other bases for establishing the Rider GTCJA rates.

7 ***Reconciliation of Rider GTCJA***

8 **Q. DID STAFF RECOMMEND A RECONCILIATION PROCESS FOR**  
9 **RIDER GTCJA?**

10 A. Yes. Staff recommended that Rider GTCJA be trued up annually to reconcile any  
11 differences between the actual tax savings passed back to customers and the tax  
12 savings recognized by the Company.

13 **Q. IS THE COMPANY AMENABLE TO INCLUDING A RECONCILIATION**  
14 **PROCESS?**

15 A. Yes. However, Staff's proposal is overly broad and does not properly limit the  
16 types of savings that can or should be reconciled. The amount of the refund for  
17 the Stub Period will be a fixed amount. It is possible determine how much of  
18 these savings should be passed back to customers and compare that to how much  
19 actually was returned to customers. That difference can be trued-up so that  
20 customers receive no more or less of a Stub Period refund than they are due.

21 A true-up process is also possible for refunding the EDIT balance. Using  
22 the last rate case as the basis for the EDIT refund obligation means that we know  
23 exactly the magnitude of the refund obligation. The balance of the refund

1 obligation will decline by the amounts refunded to customers and there will be a  
2 point when the amount owed to customers is \$0. The annual amount of the EDIT  
3 amortization will be adjusted periodically (at least annually) to reflect changes in  
4 the ARAM rates for the protected EDITs.

5 If the Commission deviates from what it approved for Columbia Gas,  
6 where it approved using the deferred tax balances from the prior rate case, and  
7 requires Duke Energy Ohio to use the December 31, 2017, balances of deferred  
8 taxes, then there may be adjustments to the EDIT liability for any deferred taxes  
9 related to regulatory assets on the December 31, 2017, balance sheet for which the  
10 Commission ultimately disallows for recovery.

11 It may or may not have been Staff's intent but the recommendation made  
12 in the Staff Report also suggests that a true up of the change in base rates is part  
13 of the reconciliation process it proposes. If that is Staff's intended proposal, then  
14 the Company vigorously objects to annually reconciling its actual book tax  
15 expense to the amounts being returned to customers for the FIT change in base  
16 rates. Whether customers receive that benefit through a change in base rates (as  
17 the Company proposed) or a percentage reduction in their base rates via Rider  
18 GTCJA (as Staff proposed), the idea of essentially tracking only the Company's  
19 income tax expense is inappropriate. Without a provision to also track the  
20 Company's earnings, the idea of tracking income tax expense is unfair to  
21 customers and to the Company. If the Company's earnings are greater than what it  
22 earned in the last base rate case, its income tax expense will be greater, and  
23 Staff's proposal would suggest that customers pay for the incremental income

1 taxes due to the Company's higher earnings. That does not seem rational or  
2 reasonable in terms of traditional ratemaking.

#### IV. CONCLUSION

3 **Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS REGARDING**  
4 **THE COMPANY'S APPLICATION IN LIGHT OF STAFF'S**  
5 **RECOMMENDATIONS.**

6 A. Duke Energy Ohio and Commission Staff agree on several points regarding the  
7 Application to flow through the benefits of the TCJA. Interestingly, the  
8 Company's proposal aligns almost completely with a proposal made by Columbia  
9 Gas and which Staff completely agreed to by signing a stipulation supporting that  
10 proposal.

11 It is important for a regulator to be consistent in the way it regulates  
12 various utilities. The utilities being regulated look to prior decisions made by the  
13 regulator as guidance for what it deems fair and reasonable. In this case, Duke  
14 Energy Ohio took guidance from the only approved proposal made by a major gas  
15 utility when it filed its Application and modeled its proposal after that utility's  
16 approved methodology for addressing the impacts of the TCJA. Staff is taking a  
17 position contrary to what it agreed to less than a year ago and now advocates a  
18 significantly different methodology.

19 In light of the fact that Staff and OCC agreed to a similar proposal made  
20 by Columbia Gas, and in light of the fact that the Columbia Gas model was  
21 approved by the Commission, the Company believes that its application in this  
22 case, which was modeled after the Columbia Gas method, is reasonable and fair.

1 To suggest otherwise would be to suggest that Staff, OCC, and the Commission  
2 advocated an unfair and unreasonable proposal in the Columbia Gas case.

3 The Company disagrees with Staff's recommendations (1) to flow through  
4 the ongoing FIT benefit via a separate rider; (2) to use the balance for deferred  
5 taxes for a period that was not used in setting base rates; (3) to segregate the  
6 refund of EDITs between base rates and Riders AU and AMRP if the overall  
7 deferred tax balances from December 31, 2017, are used for establishing the  
8 EDITs to be refunded; and (4) to use balances for deferred taxes related to items  
9 that Staff is currently recommending be disallowed for recovery or that the  
10 Commission has not yet ruled on regarding recoverability.

11 Duke Energy Ohio asks that the Commission reject Staff's  
12 recommendations, as discussed above.

13 Lastly, it is the Company's intention to ensure that customers receive all  
14 of the benefits of the TCJA that they are owed. Most of the differences between  
15 the Company's Application, as filed, and Staff's recommendations are related to  
16 form rather than substance. Approving the Company's Application, as filed but  
17 adjusted to amortize unprotected EDITs over six years and with the provisions for  
18 reconciliation I describe above, will accomplish that objective in a manner that is  
19 fair and reasonable for all stakeholders.

20 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

21 **A.** Yes.

**BEFORE  
THE PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Application of Duke Energy Ohio, Inc., for an Increase in Gas Rates.	:	Case No. 12-1685-GA-AIR

RATES DIVISION  
UTILITIES DEPARTMENT  
PUBLIC UTILITIES COMMISSION OF OHIO**

**IN SUPPORT  
OF  
JOINT STIPULATION AND RECOMMENDATION**

Staff Exhibit \_\_\_\_\_

**April 22, 2013**

1 1. Q. Please state your name and your business address.

2 A. My name is Wm. Ross Willis. My business address is 180 East Broad  
3 Street, Columbus, Ohio 43215.  
4

5 2. Q. By who are you employed?

6 A. I am employed by the Public Utilities Commission of Ohio (PUCO).  
7

8 3. Q. What is your current position with the PUCO and what are your duties?

9 A. I am Chief of the Rates Division within the Utilities Department. My  
10 duties include developing, organizing, and directing staff during rate case  
11 investigations and other financial audits of public utility companies subject  
12 to the jurisdiction of the PUCO. The determination of revenue require-  
13 ments in connection with rate case investigations is under my purview.  
14

15 4. Q. Would you briefly state your educational background?

16 A. I earned a Bachelor of Business Administration Degree that included a  
17 Major in Finance and a Minor in Management from Ohio University in  
18 December 1983. In November 1986, I attended the Academy of Military  
19 Science and received a commission in the Air National Guard. Moreover, I  
20 have attended various seminars and rate case training programs sponsored  
21 by this Commission.  
22

1     5.     Q.     Please outline your work experience.

2           A.     Following graduation from Ohio University, I joined the Public Utilities  
3           Commission in February 1984, in the Utilities Department as a Utility  
4           Examiner. I have held several technical and managerial positions with the  
5           PUCO. They include Utility Examiner, Utility Rate Analyst, Utility Audit  
6           Coordinator, Utility Supervisor, Utility Administrator 1, Utility Adminis-  
7           trator 2, and my current position, Chief of Rates Division.

8  
9           My military career spans 27 honorable years of service with the Ohio  
10          National Guard. I earned the rank of Lieutenant Colonel and I am a veteran  
11          of the war in Afghanistan. I retired from the Air National Guard in March  
12          2006.

13  
14          I have previously testified before this Commission.

15  
16     6.     Q.     What is the purpose of your testimony in this proceeding?

17          A.     The purpose of my testimony is to support the Joint Stipulation and Recom-  
18          mendation (Stipulation) and the proposed revenue requirement schedules,  
19          which are attached to my testimony.

20  
21     7.     Q.     Are the results of the Stipulation reasonable?

1       A.    Yes. The results are reasonable for three basic reasons: (1) the settlement  
2            was a product of serious bargaining among capable, knowledgeable parties;  
3            (2) the settlement, as a package, benefits ratepayers and is in the public  
4            interest; and (3) the settlement does not violate any regulatory principle or  
5            practice.

6  
7    8.    Q.    Is the settlement a product of serious bargaining among capable,  
8            knowledgeable parties?

9       A.    Yes. The results of the settlement reflect consensus building on the part of  
10           the signatories to the settlement. The signatories are represented by experi-  
11           enced counsel who regularly participate in regulatory proceedings before  
12           the Commission and are familiar with Commission practice and procedure.  
13           The agreement is the result of good faith negotiations and serious bargain-  
14           ing on the part of the signatories to the Stipulation and Recommendation.

15  
16   9.    Q.    How does the Stipulation, as a package, benefit ratepayers and is in the  
17           public interest?

18       A.    The signatories to the settlement have examined the case record and repre-  
19           sent diverse interests. The stipulated settlement results in a just and reason-  
20           able revenue requirement that benefits ratepayers by recognizing some of  
21           the objections to the Staff Report of Investigation, rejecting some of the  
22           objections, and where appropriate, alternative approaches were considered.

The settlement is in the public interest because it:

- Avoids the added cost of litigation by limiting litigation to the various positions taken associated with the remediation of manufactured gas plants (MGP) sites.
- Combines Duke's existing base rates with existing riders for SmartGrid and Accelerated Main Replacement Program (AMRP) resulting in a \$0 increase in base gas retail rates.
- The incremental increase to the AMRP for residential customers will be capped at \$1.00 annually on a cumulative basis.
- The Rider AMRP revenue requirement calculation will include amortization of camera work expense over a five-year period related to the AMRP activity during 2001 through 2006.
- Duke agrees to withdraw its request for approval of an Accelerated Service Replacement Program (ASRP) saving \$317 million in rates over a 9-10 year time frame. If this Rider is proposed again by Duke in the future, and if the Commission approves such Rider, Duke shall ensure that rates for such a program will not go into effect before January 1, 2016.
- Reconnection charge will remain at the current amount.
- Recognizes the Staff's recommendation that Rider FRT (Facilities Relocation – Mass Transportation) will not be approved in this proceeding.
- Establishes a rate of return of 7.73% based on a return on equity of 9.84% and a cost of debt at 5.32%
- Provides for shareholder-funded low-income weatherization programs and a low income fuel fund.

1    10.    Q.    Does the settlement violate any regulatory principle or practice?

2            A.    No. The revenue requirement schedules attached to my testimony are the  
3                    result of traditional rate setting policies, practices, and procedures followed  
4                    by the Staff. The recommended revenue requirement is consistent with  
5                    sound regulatory rate setting practices.

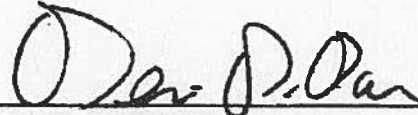

6

7    11.    Q.    Does this conclude your testimony?

8            A.    Yes, it does. However, I reserve the right to submit supplemental testi-  
9                    mony as described herein, as new information subsequently becomes avail-  
10                  able or in response to positions taken by other parties.

## PROOF OF SERVICE

I hereby certify that a true copy of the foregoing Prefiled Testimony of Wm. Ross Willis, submitted on behalf of the Staff of the Public Utilities Commission of Ohio, was served via electronic mail, upon the following parties of record, this 22 day of April, 2013.

**Devin D. Parram**  
Assistant Attorney General
