AUGUST 30, 2019

One Source Energy is continuing to actively secure a buyer for all systems in place. To date One Source Energy has received an official offer from Northeast Ohio as of this morning of which is being reviewed, a copy of this offer follows.

In addition to securing a permanent sale, One Source Energy is also actively securing a temporary operations contract per suggestion of the commission's staff, in which an already regulated utility will assume the responsibility of operating the system in its entirety until the final details of the sales negotiation can be reached. A copy of this agreement follows.

One Source Energy is actively taking the suggested and necessary measures in which to ensure that the customers can go without a natural gas service interruption and is asking that the commission grants an extension on the original September 6th deadline to September 20th to ensure that either a temporary operations contract and/or a permanent sales contract is in place and that the change over can be done safely, and in the best interest of the customers.

This foregoing document was electronically filed with the Public Utilities
