Subject: Icebreaker Wind, Inc., Case # 16-1871 EL-BGN

Good Afternoon,

I am writing in regard to the delayed payment of \$150,000 by LEEDCo, billed by by state regulators to cover the siting board's administrative costs. Having paid a \$50,000 application fee in 2017, the application process continues to drag on. It is only reasonable that after this extensive length of time, the continued review costs, the extra review work, that many citizens believe enough is enough. The deadline for LEEDCo was August 26. After two years of opportunity to pay the fee, why would the deadline be extended ONCE AGAIN? How many of us would be given this many chances to pay our outstanding bills?

Why didn't LEEDCo have to pay the \$76,840 to the state Attorney General's office to cover the cost of the review they have already performed? Why does LEEDCo, and now, Fred Olsen, who is the applicant for the Icebreaker Wind, Inc. "for profit" project continue to be given one extension after another?

As stated, enough is enough. It is time for Lake Erie, all who drink it's water, all wildlife residing in it, all flying animals who migrate over it, all fisherman and pleasure boaters who depend on it for economic and recreational purposes, all of us- to put aside the decade long angst associated with feared oil spills, explosions and fires, blade shear, turbine collapse, and more that threaten Lake Erie as a result of turning it into an industrial wind energy facility.

Please put a permanent end to this madness once and for all.

Respectfully Submitted,

Suzanne Albright
