RIDER GCR Generation Cost Reconciliation Rider

APPLICABILITY:

Applicable to any customer who receives electric service under the Company's rate schedules. The Generation Cost Reconciliation Rider (GCR) charge will apply, by rate schedule, effective for service rendered beginning January 1, 2020, for all kWhs per kWh.

RATE:	GCR1	GCR2
RS	0.0009¢	0.0000¢
GS	0.0009¢	0.0000¢
GP	0.0009¢	0.0000¢

STL	0.0009¢	0.0000¢
TRF	0.0009¢	0.0000¢
POL	0.0009¢	0.0000¢

The GCR charge shall be calculated as follows:

GCR = {[GCR Deferral Balance] / S} x 1/(1 - CAT) x {(1 - LOSS_{AVG}) / (1 - LOSS)}

Where:

- i. The calculation period is the three-month period ended two months prior to the effective dates of the updated rider (i.e. three months ended October 31, January 31, April 30, and July 31).
- ii. Each component of the formula includes the aggregated data for The Cleveland Electric Illuminating Company, Ohio Edison Company, and The Toledo Edison Company.
- iii. For any given billing period, only the non-zero GCR charge will be applied.

Effective: April 1, 2018

RIDER GCR Generation Cost Reconciliation Rider

GCR Deferral Balance = [(Bp - GCR_{REV} - GEN_{REV} + Es + E_{CBP}) + I]

B_P = The actual reconciliation balance, including applicable interest, at the end of the

previous calculation period.

GCR_{REV} = The actual revenue associated with Rider GCR, as billed for the calculation

period, excluding applicable Commercial Activity Tax.

GEN_{REV} = The actual revenue associated with Riders GEN, HLF, RCP, RTP and CPP as

billed for the calculation period, excluding applicable Commercial Activity Tax.

Es = The actual cost of supplying generation service to SSO customers and

customers taking service under special contracts for the calculation period.

E_{CBP} = The competitive bidding process expenses.

I = The applicable interest for the calculation period at a monthly rate of 0.7066%.

S = The projected kWh sales for the period during which Rider GCR will be charged.

CAT = The Commercial Activity Tax rate as established in Section 5751.03 of the Ohio

Revised Code.

LOSS = The loss factor associated with each rate category based on service voltage.

(See Page 1 of Exhibit C to the Application in Case No. 08-0935-EL-SSO).

LOSS_{AVG} = The aggregated loss factor.

AVOIDABILITY:

The GCR charge shall equal GCR1 and GCR1 is not applied to customers during the calculation period the customer takes electric generation service from a certified supplier, unless the **GCR Deferral Balance** > (10% x E_s) for two consecutive calculation periods. If the **GCR Deferral Balance** > (10% x E_s) for two consecutive calculations periods, then, subject to Commission approval, GCR2 = GCR and GCR2 is not avoidable for customers who take electric generation service from a certified supplier.

Regardless, in the event that a supplier that has been providing power as a result of the competitive bid process defaults during the applicable ESP period, the Company upon its belief that such default will cause the GCR Deferral Balance to exceed the 10% threshold, may determine that the GCR charge is not avoidable for customers who take generation from a certified supplier, subject to Commission approval.

RIDER UPDATES:

The charges contained in this Rider shall be updated and reconciled on a quarterly basis. No later than December 1st, March 1st, June 1st and September 1st of each year, the Company will file with the PUCO a request for approval of the Rider charges which, unless otherwise ordered by the PUCO, shall become effective on a service rendered basis on January 1st, April 1st, July 1st and October 1st of each year. This Rider is subject to reconciliation, including, but not limited to increases or refunds. Such reconciliation shall be based solely upon the results of audits ordered by the Commission in accordance with the July 18, 2012 Opinion and Order in Case No. 12-1230-EL-SSO, and the March 31, 2016 Opinion and Order in Case No. 14-1297-EL-SSO.
