### **STAFF LETTER**

---

On October 23, 2019, Ohio House Bill 6 (HB6) will become effective. As such, it will modify the individual annual energy efficiency targets of each electric distribution utility (EDU) to a statewide, cumulative energy savings requirement. Under HB 6, the EDUs, collectively, must achieve a cumulative energy savings total of 17.5%. Currently, on or before May 15<sup>th</sup> of every year, each EDU provides an annual status report to demonstrate its individual prior year's program achievements. With the changes being introduced by HB 6, Staff determined it would be helpful to provide to the Commission the current level of energy efficiency savings achieved collectively by the EDUs through the end of 2019, including energy savings forecasted to be achieved.

To determine the energy efficiency savings collectively achieved to date, Staff asked each of the EDUs to provide data demonstrating savings achieved and forecasted goals through the end of 2019. Using the updated data provided by each EDU, Staff prepared a summary, which adjusted

the energy efficiency savings, both achieved and forecasted, through the remainder of 2019. See Table 1 below. Staff intends to update this chart on a monthly basis and file the updated charts in the dockets of the EDUs' portfolio plan cases. The cumulative compliance tables below represent actual and forecasted savings through the end of November, 2019.
