Increase natural gas capacity to Marysville and SE Union Co.

Sumitomo Electric Wiring Systems Inc. operates a large facility along the US 33 Corridor and has called Marysville home for more than 25 years. With the expected industrial and residential growth in the area, our organization is concerned that current and future plans will be impacted by a lack of adequate gas supply to this area. The impact to our company and other companies in the community warrants a long-term solution with adequate capacity to continue industry and community growth.
