Date: Wednesday, April 8, 2020 12:08:26 PM

As counter to our councilman's (Tom Bullock) endorsement recommendation this morning, I am a Lakewood resident writing a note opposing his endorsement and in protest to this planned project for the following reasons: 1. Ohio EPA, ODNR, and Wildlife have not each (independently) completed their own studies (relied on LEEDCo's consultant's and other Federal Agency reports). These should be public and provided to public specifically impact on wildlife (birds, bats and fish) in Lake Erie; 2. Future and ongoing maintenance of the turbines (5-10+ years) out has not specifically identified under what circumstances /scenarios will their removal be required for non-performance 3. Economic projections and any public funds or grants should have clawback refund provision and require turbine removal provision (with funds for 100% held in escrow for their future removal) if this project does not create the inflated jobs or economic benefit promised to the public 4. There is no stipulation that all materials must be made in the USA (not imported) and all profits from energy remain in NE Ohio (not exported). 5. Cost of Electricity should go down for NE Ohio residents (not up). For these reasons more time and studies are required for this project from State of Ohio and presented in a public manner and be very transparent. Without fully addressing each of these issues, this project will have negative impact for our region for the next generation and negative impact for Lake Erie--- which is Ohio's and one of the world's greatest natural fresh-water resources.

George Stevens

Lakewood, Ohio
