

STAFF-DR-01-003

REQUEST:

As this case is similar to the 19-1471 case, in terms of ODOT wanting you to relocate due to I-75 improvements, and in light of the residential issues we are dealing with for that one, can you lay out the proximity of the closest structures to homes?

- a. If there are any stub poles?
- b. And how you will handle complaints from residents if they have them as it relates to this project please?

RESPONSE: The poles are located either behind an old police station, between the highway and railroad, or between an existing substation, which is next to a car dealership and the Mill Creek Greenway and Mill Creek.

- a. There are no stub poles associated with this project.
- b. There are no residents that are directly affected by the replacements. If a resident complains, the process will be the same as what was done in the Elmwood Place complaint resolution process.

PERSON RESPONSIBLE: Dustin Giesler
