When we could put in clean energy, solar, wind - why would we put a fracked gas power plant on the OSU campus? Do we really think its clean? The cycle from excavation to disposal of the radioactive Toxic liquid and solid frack waste is devastating to Ohio's water, air, soil. How dare you let the profits for oil and gas win over the health and well being of our osu students and Metro columbus residents. We Don't want a fracked gas power plant in Columbus Period.
