Case No. 19-1641-EL-BGN

I live and rent houses near campus. This plant will destroy my investments. If it was solar or wind, I would have no problem with this operations, but natural gas is terribly toxic and dangerous to people and our resources. Additionally, this would be a plant for a dying industry. Once it falls in disrepair, who will pay for the inevitable clean-ups? Very concerned. I'm 100 percent against as is anyone familiar with the reality--other than industry folks.

Sandra M. Bolzenius
