Subject: Comment re: case # 19-1641-EL-BGN

I'm writing regarding Ohio State's proposed combined heating and power plant (case # 19-1641-EL-BGN). Like many, I oppose the plant on the grounds that natural gas cannot comprise any part of a solution to the climate crisis, and that infrastructure locking OSU into natural gas represents a step backward. I also believe there should be a third hearing after OSU students return to campus to ensure that they have sufficient opportunity to learn about and comment on the plant. OSU students will be among the most impacted by a large project like this and deserve to have their voices heard. Two discreet hearings over the summer do not provide adequate forums for students to provide input on the plant.
