Subject: LEEDCo Icebreaker wind project

Dear Chairman Randazzo and Board Members:

I am writing to thank you for your decision to require feathering to protect birds at the Icebreaker Wind project.

Along with thousands of other individuals, every spring and autumn my family travels from all across the country to meet in northern Ohio and experience the incredible spectacle of bird migration. Each visit my family spends a week visiting parks, restaurants, and other business's in the region. Without the birds, we would not be there.

I support renewable energy development if it minimizes its impacts to wildlife. But with so many important promises left unfulfilled by the developer, I strongly believe you were right to take this commonsense step to protect migratory birds and bats.

As you know, the project site is in a National Audubon Society-designated Globally Important Bird Area due to its use by millions of birds. The project developers have yet to provide a plan for monitoring bird kills at the facility, and there has been no mention of mitigating these impacts through conservation actions. This leaves too much risk and too many unknowns in an area of great importance to birds.

Like millions of Americans, I value birds for their aesthetic, economic, and intrinsic value. But a recent study shows that the United States and Canada lost nearly 3 billion birds – almost 30 percent of the total population – since 1970.

This is not the time to take chances with our declining bird populations. Thank you for your commonsense decision to require feathering to protect this diminishing public resource.

Sincerely,

Ryan Posgai
Cincinnati, OH
