This reeks of backroom deals with a corporation that has no track record and has displayed zero effort in accommodating the HUNDREDS OF HOMES AFFECTED! There has been no thorough or legitimate studies that can definitively say that those surrounded by these panels will not experience dangerous and terminal effects on the body. The children that play outside are being offered as guinea pigs for this experiment in corporate greed and the removal of citizens rights.

---

As a resident of Allen County I am appalled that this development just came to light several weeks ago. The massive size of this project without community input until now is not acceptable. The impact of a site of this size is not good for the environment, wildlife and the residents of the county. The eye sore will be horrendous, hiring goats and sheep to keep the vegetation in check is laughable. The trouble with these projects is they are all smoke and mirrors with the promise of a lot of money until the entity goes bankrupt. The county is left with a huge expense to clean up. The lack of transparency is not acceptable. The lack of Public meetings simply because of Covid is not acceptable. They could have had them outside when it was warm and did not because the state granted them an exemption because of Covid. None of this is acceptable.
