This is a large solar project too close to residential areas in Auglaize and Allen counties. The birch solar company needs to find land where it won't affect residential areas, wildlife, former Shawnee Indian land, watershed, and the list goes on and on. This project has been snuck into the neighborhood without informing the people it will affect. There are no studies on how it will affect the property owners' property value, the health risk in the future. The people in this area do not want this and it should be stopped. I don't know anyone that would want to look out every window in your house and all you see are these giant panels where there always has been beautiful sunsets, wildlife and crops.
