This project has been rammed thru with minimal notices to the community. When our public officials aren't aware of this, it is a problem. This project is going to destroy our community home values. The long term effects are unknown. The wildlife will be seriously impacted. The Birch officials wouldn't show up at our public meeting citing: the plane ticket was \$2000. Stop in the bucket for the costs our township will endure. Furthermore, the land proclaimed to be used is not zoned for such a project. We are in a tornado prone area. What happens when their panels fly thru our township? Who will be performing maintenance after installed? So many questions. . . So few answers. There is no way this should be moving at the pace they are trying to slide it in under our noses.
