Let me start by saying, I have solar panels on my garage roof. So I am not against solar, but I AM against 2600 acres being taken! If you want to generate electricity, then ask homeowners to install them on their own roofs. I listened to the meeting at Apollo. No, solar panels don't make noise, but converters do! The reason the people don't trust is because of half truths! They should admit that this is part of the "Green New Deal" that most Americans are not for. And it should not be that zoning laws are void when these type of projects come to an area. Shame on our elected officials that only see "green" instead of following the will of the people. CA had blackouts because of the shutdown of power plants in place of solar. And now they are experiencing blackouts like many "developing" countries, because they can't generate enough power. Just be truthful!
