---

Listed in the documents it is stated that Birch Solar Energy has completed their obligation of notification of public meetings, How can this list be considered as a completion of this obligation. There currently are people that live on the proposed boundaries on this list that as of today have not received notification. This list has people as trustees that have never held that position. There are people that should not be on this list as well as people that should be but are not. This list was carelessly put together and submitted as completing the obligation. Why is this project being pencil whipped and pushed through. As a person that lives a half mile from the boundary and not on the list I feel that this certification needs denied or put on hold until all the facts are out in the open. The obligation of notification has not been completed and is beyond the allowable time frame.
