I am attempting to view the Birch Solar LLC meeting online and it keeps freezing. I then attempted to view on my phone and tablet to no avail. This is not acceptable!

I'm so frustrated. It took me 15 minutes to get the presentation on the internet. Now it keeps freezing up and skipping ahead. I keep calling the phone number and it tells me the code is not valid. Now the presentation is totally froze. I give up. This is not fair.

I am trying to participate in the online public information presentation, and it is stating that it is not able to connect to the destination at this time. I feel that this online/virtual meeting is very inadequate for relaying public information. I believe that the application for this project should be put on hold until the public can be properly informed and an in-person public meeting can be held.

why were we short changed on our meeting Friday night. This is the time they scheduled the meeting and because it is too late they are ending the meeting. I cannot make the meeting Monday night and now I can not be part of the meeting with the Sitting Board present. I sent 10 questions and did not have one questioned answered . I feel ignored and short changed.

My complaint against 20-1605EL-BGN. I am against this massive industrial project. Way too big and near too many people. Not to mention environmental and health issues. To top that off I don't trust Kevin Smith. He ran the Solar Thermal Project Crescent Dunes and said "We're proud to be doing our part to win the future." That project failed terribly and cost our government what was it? \$737 million? He's telling us the same lies and we don't trust him. He'll destroy everything here if he tries to put a solar field in Allen and Auglaize County. He'll screw us like he screwed the Nevada Project. Please don't approve this project. Thank you.
