Michael Baker 00647156

I'm not opposed to a rate increase to help cover the increasing cost of services rendered, but when you are increasing the payment by roughly 150% is unmanageable, especially in the current economy. As a person who lives by themselves I try to use as little water as possible, but to pay \$92.75 for water and another \$51 for sewer, depending on water usage I could be paying at minimum \$143.75. If I have a heavy month of water usage it could be closer to \$200 a month between the two. The water is nothing special in-comparison to other towns water. Like I said before in the beginning, I'm not opposed to a water increase to help cover expenses occurred but, the increase needs to be looked at and in a more reasonable fashion.

Sincerely,

Jermeki Anderson
