I am against the very large solar project they are projecting for. Shawnee township. It is in a very residential area and not appropriate in this area. It is going to hurt future home sales in the area and it will decrease the tax base for our Shawnee schools

Lightsource bp continues to state that the solar panels are non hazardous even if damaged. I would like that the state request a Full TCLP Analysis on a crushed solar panel, as well as all TCLP analysis performed on solar panels prior to installation. This results should be made public to the citizens of Allen and Auglaize County.

I have been a resident for 32 years on property adjacent to land that Lightsourcebp is in the process of seeking a permit to construct their Birch Solar Project. While you are considering the proposed project's possible harmful side effects on the soil, wildlife, water, and other aspects of the environment, I ask you to please consider the harmful side effects it will cause to hundreds of residents in the area. The stress, anxiety, and fear we are experiencing often manifest themselves as anger, outrage, and sometimes even irrational comments and actions. Please understand that we are heart-sick. And please take into consideration the human damage this project will cause.

Subject: Birch Solar Industrial Project (Not Farm!)

My name is Barb Kuhbander. I am grieving and have concerns. My son and his family moved into their dream home 2 1/2 years ago put in a lot of money for improving their home/property. A secluded wooded area on South Kemp Rd. This solar project will be surrounding their home/property on all 4 sides. After many diligent research shared by our group is a very frightening to me. I'm am so heartbroken for my son's family and neighboring home owners that are greatly impacted by this. Opposing solar energy coming in from a foreign company called Lightsource Bp come in to invade their beautiful countryside and cause havoc to the AG community and residential properties. This company is known to get what they want(money) then bug out and leaving the community to maintain it. The running track of CEO Steve Smith bailed out on a solar development in Nevada called Crescent Dunes. He said there would be 10 employed to run project. But now at last virtual meeting there would be "4-5 employees" to maintain a 2,600 acres of land with 900 acres of panels surrounded by 1900 acres of fencing. 2-4 sheep per acre total of 76 sheep. Their selling point is to call it a "farm".

Misinforming the public on our local news. Many have complain that the virtual meetings that was held is "rigged" unable to get on and to get their questions answered and comments heard. Unable to see others questions. Remember us Allen/Auglaize county. Please hear our plea and keep Birch Solar Industrial Project out!! This community opposes!! We hope your vote will be in our favor.

Thank you  
Local supporter  
Barbara Kuhbander
