

**BEFORE
THE PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Application of)	
Columbia Gas of Ohio, Inc. for)	Case No. 08-0606-GA-AAM
Authority to Defer Environmental)	
Investigation and Remediation Costs.)	

**ANNUAL DEFERRAL REPORT OF
COLUMBIA GAS OF OHIO, INC.**

On May 19, 2008, Columbia Gas of Ohio, Inc. ("Columbia") filed its Application in this docket, requesting authority to defer on its books environmental investigation and remediation costs. By Entry dated September 24, 2008, the Commission approved the Application. Paragraph 11 of said Entry provides:

Prior to their deferral on its books, we require Columbia to make an annual filing in this docket detailing the costs incurred in the prior 12-month period covered by the deferrals and the total amount deferred to date.

Pursuant to Paragraph 11 of the September 24, 2008 Entry, Columbia provides the following information. The costs Columbia incurred for the period December 2019 through November 2020, and which Columbia proposes to defer, are \$3,660,205.35. These costs are comprised of expenses incurred in the continued remediation of sites in Toledo, Fremont, Fostoria, Athens, Portsmouth, Lorain, Elyria, and Columbus, Ohio. Columbia's projects and costs are described in the following attachments:

- Attachment 1 — Marion project description
- Attachment 2 — Bellevue project description
- Attachment 3 — Grandview Heights/Goodale project description
- Attachment 4 — Toledo (Swan Creek) project description
- Attachment 5 — Toledo cost detail
- Attachment 6 — Fremont project description

Attachment 7 — Fremont cost detail
Attachment 8 — Fostoria (Crocker Street) project description
Attachment 9 — Fostoria (Crocker Street) cost detail
Attachment 10 — Athens project description
Attachment 11 — Athens cost detail
Attachment 12 — Portsmouth project description
Attachment 13 — Portsmouth cost detail
Attachment 14 — Lorain project description
Attachment 15 — Lorain cost detail
Attachment 16 — Elyria project description
Attachment 17 — Elyria cost detail
Attachment 18 — Columbus I project description
Attachment 19 — Columbus I cost detail
Attachment 20 — Columbus II project description
Attachment 21 — Columbus II cost detail
Attachment 22 — Fostoria II (Wood Street) project description
Attachment 23 — Fostoria II (Wood Street) cost detail
Attachment 24 — Toledo II project description
Attachment 25 — Toledo II cost detail

Additionally, Columbia has included in this report, as Attachment 26, a schedule showing the amounts deferred by year for all projects, and the total amount deferred to date.

Respectfully submitted by,

COLUMBIA GAS OF OHIO, INC.

/s/ Joseph M. Clark

ATTACHMENT 1

Marion

Description: This was a former manufactured gas plant (“MGP”) site located at the southwest corner of West Street and Canal Street, which have since been named Prospect Street and Columbia Street respectively, in Marion, Marion County, Ohio. This MGP site, formerly owned by Marion Gas-Light Company, was operated from 1862 until 1902. Review of historical information, including Sanborn Fire Insurance Maps, deeds and other records, indicates the facility contained a number of structures including retorts, a coal shed, a meter house, tar well and gas holders. This former MGP plant was demolished between 1908 and 1914, with the property being redeveloped as housing with approximately 18 houses being constructed in the footprint of the MGP. Columbia has reviewed its corporate history and has determined it is a successor to entities that owned and operated the MGP.

A Phase I Assessment and phase II assessment were completed in 2006. Based upon findings of those investigations, 18 homes were purchased and demolished in advance of further site investigation activities in 2008. Remediation of the soil impacts was completed in 2011 and a No Further Action letter and Covenant Not to Sue (“CNS”) was received in 2013 from Ohio EPA under the Voluntary Action Program (“VAP”).

In November 2014, additional activities required under Ohio’s VAP and related to the CNS were completed. These activities included submittal of documentation and participation in a meeting with the Ohio EPA related to a random CNS audit conducted by the Ohio EPA. The final audit report has not been received to date by Columbia.

No activities were performed during the twelve-month periods ending in November 2015, 2016, 2017, 2018, 2019, and 2020. No additional activities are expected at this location.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period January 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$910,678.93. This amount was deferred previously.

ATTACHMENT 2

Bellevue

Description: This former MGP site is located on Howard Street, southwest of the intersection of Howard Street and Hamilton Street in Bellevue, Sandusky County, Ohio. A multi-unit residential structure and at least one private residence are located within the footprint of the former MGP. The site is bounded to the south by active railroad tracks beyond which lie a manufacturing facility and a residential area. The site is bounded to the north and west by residential areas. The site is bounded to the east by several residences beyond which lies an apparent railcar maintenance facility.

Based on a review of readily available historical information, including the Sanborn Fire Insurance maps, the MGP was constructed prior to 1899, and consisted of a gas plant building and a gas holder. A rail siding was also located adjacent to the plant, likely used for coal delivery. The 1901 Brown's Directory of American Gas Companies ("Brown's Directory") indicates that the facility was in operation in 1901 and that both coal carbonization and water gas processes were used to produce gas. A comparison of the 1899 and 1906 Sanborn Fire Insurance Maps indicate that the MGP building was expanded during this time period. The 1904 Brown's Directory states that manufactured gas operations had ceased and transitioned to natural gas prior to 1904. Columbia has reviewed its corporate history and has determined it is a successor to entities that owned and operated the MGP.

A Phase I environmental site assessment was completed in 2011 and a Phase II site assessment(s) were conducted between 2011 and 2013. Remediation of MGP soil impacts was completed in late 2013 and a No Further Action letter was issued by the VAP Certified Professional ("CP") for the project.

During the twelve-month periods ending in November 2015, 2016, 2017, 2018, 2019, and 2020, there were no additional activities performed or required. No additional activities are expected at this location.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period July 2009 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$555,823.98. This amount was deferred previously.

ATTACHMENT 3

Grandview Heights

Description: These facilities were comprised of a former district office, service center, warehouse, meter shops and phone center located at 825 Burr Avenue, 860 Burr Avenue, 901 Burr Avenue, 909 Burr Avenue and 920 Goodale Street, Grandview Heights, Ohio. These properties were sold by Columbia in December 2008, pursuant to a Letter Agreement For Purchase of Real Estate, ("Letter Agreement") dated July 18, 2008, as amended, between Columbia and NRI Equity Land Investments, LLC ("NRI"), and joined by Nationwide Realty Investors, Ltd. The purpose of this Letter Agreement was to clarify, resolve and allocate the financial responsibilities for the environmental condition of certain portions of the property and to close the transaction as contemplated by the Letter Agreement. Pursuant to the Letter Agreement the parties agreed that certain tests and investigations documented the presence of lead and polynuclear aromatic hydrocarbons ("PAHs") on or under the property which require investigation, cleanup, removal action, remedial action or other corrective action. Columbia agreed to pay a portion of the cost of the investigation and remediation costs associated therewith and a portion of the costs of the investigation, cleanup, removal action, remedial action or corrective action undertaken with respect to the documented presence of lead and PAHs on the property through: (1) a reduction in the purchase price of the property set forth in Agreement by the sum of \$200,000; and, (2) payment to NRI of the sum of \$500,000 toward NRI's costs that it has incurred or will incur, in the performance of investigation, cleanup, removal action, remedial action or corrective action as consideration for NRI's assumption of this responsibility. This amount was based on Columbia's evaluation of a report prepared by NRI's consultant. This report included preliminary cost evaluations that included estimates ranging from a low of \$508,500 up to \$3,218,565 dependent upon the intended use of the land.

During the twelve-month periods ending in November 2015, 2016, 2017, 2018, 2019, and 2020, no activities were completed on Grandview Heights. No additional activities are expected at this location.

Total Project Costs: Total incremental costs incurred by Columbia during the January 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$475,000. This amount was deferred previously.

ATTACHMENT 4

Toledo (Swan Creek)

Description: The former Toledo Gas Light and Coke Company site located at 333 South Erie Street, Toledo, was owned and operated by Columbia as a Service Center until it sold the property and building in March 2011. The site is in the process of being remediated in accordance with Ohio's VAP regulations by the new property owner, River Road Redevelopment H, LLC ("R3II"). While the site was originally entered into the VAP with Columbia as the remedial applicant, after purchasing the property, R3II is now the remedial applicant. The Ohio EPA issued a Covenant Not to Sue for the site on November 10, 2014.

The former MGP property, located at 333 South Erie Street, Toledo, is adjacent to Swan Creek. The indemnification with R3I1 does not cover remediation of Swan Creek. Columbia will manage any sediment investigation and remediation under a future regulatory scenario. Sediments have been subject to a preliminary ecological assessment and limited sampling which indicated some areas of MGP related impacts. The state and federal regulatory agencies have expressed interest in the status of Swan Creek as a tributary to the Maumee River which is an identified Area of Concern under the Federal Great Lakes Legacy Act. There is a documented history of multiple parties discharging to the creek. Additional sediment investigation will be necessary since the extent of impacts and responsibility for those impacts have yet to be determined. In 2011, Columbia authorized an evaluation of: 1) sediment remedial approaches; 2) potential participation in Great Lakes Legacy Act Funding; and, 3) the potential impacts from other sources.

During the twelve-month periods ending in November 2015, 2016, and 2017, no activities were completed on Swan Creek.

Costs were incurred in 2018, 2019, and 2020 to monitor agency initiatives to characterize Swan Creek sediment quality under the Great Lakes Legacy Act and to evaluate other potential contributors to Swan Creek sediment degradation. In addition, the annual cost modeling evaluation was completed.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the January 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$165,036.53. This amount is comprised of \$163,773.16 previously deferred and \$1,263.37 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 5 sets forth a

detailed breakdown of these expenses incurred during the period December 2019 through November 2020.

Fremont

Description: An MGP operated at the Site from about 1873 to 1904 on two parcels at Justice and Knapp Streets, Fremont, Sandusky County, Ohio. The MGP Property was owned by a predecessor of Columbia from 1863 to 1929. The Holder Property was owned by a predecessor of Columbia from 1901 to 1935. A Phase I Assessment for the site was completed in 2011.

A Phase II assessment was started in 2012 and is ongoing. Columbia has conducted multiple sampling events at the Site between August 2012 and October 2018 including three soil sampling events, two phases of Tar Green Optical Screening Tool ("TarGOST®") investigation to identify and delineate dense non-aqueous phase ("DNAPL") impacts at the Site, multiple groundwater sampling events and multiple vapor/air sampling events.

During the twelve-month period ending in November 2019, additional investigation work to address data gaps was completed on both of the MGP parcels. A Pass-Through Demonstration was submitted to the Ohio EPA to demonstrate that Chlorinated Volatile Organic Compounds ("CVOCs") detected in groundwater and sub-slab vapor at the Site are not associated with the former MGP operations that occurred at the Site or following the former MGP operations. The Ohio EPA did not accept the Pass-Through Demonstration for the Holder property and Columbia is negotiating with the Ohio EPA on next steps for 2020.

During the twelve-month period ending in November 2020, a Remedial Alternatives Evaluation was completed and the annual cost modeling evaluation was completed. It is anticipated that Columbia will meet with the property owner in early 2021 to discuss proposed remedial work for 2021.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2010 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$1,072,733.31. This amount is comprised of \$1,012,612.95 previously deferred and \$60,120.36 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 7 sets forth a detailed breakdown of these expenses incurred during the period December 2019 through November 2020.

ATTACHMENT 8

Fostoria I (Crocker St.)

Description: In 2011 Columbia authorized a history consulting firm to research corporate successors to the late nineteenth century and early twentieth century entities known to have been associated with two former MGPs located in Fostoria, Ohio. Columbia has reviewed its corporate history and has determined it is a successor to entities that owned or operated the former MGP on Crocker Street. Therefore, in 2011 Columbia authorized a consultant to conduct a Phase I Property Assessment at that MGP property in conformance with Ohio's VAP regulations. In addition, Columbia performed a historic evaluation to confirm site ownership, past operating practices and availability of historic information to aid in site evaluation.

Efforts continued to identify and contact the property owners in order to negotiate access to the Fostoria I (Crocker Street) MGP. The owner agreed to allow access to Columbia for investigation work in November 2018. No costs were incurred between December 2017 and November 2018 for this work.

During the twelve-month period ending in November 2019 a Phase II site investigation was conducted that included soil borings, test pits, monitoring well installation and sampling, and soil vapor sampling. Also in 2019, a Community Relation Plan was developed and instituted.

During the twelve-month period ending November 2020, the following work was completed: in December 2019 to January 2020, an additional pre-design subsurface investigation was performed. Remediation of MGP subsurface impacts identified in the Phase II and pre-design investigations was initiated in August of 2020 and completed in early November of 2020. In addition the annual cost modeling evaluation was completed. An environmental restrictive covenant (ERC) will be presented to the current property owner to be recorded in early 2021 with No Further Action documentation by the VAP Certified Professional.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2010 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$1,644,655.72. This amount was deferred previously. This amount is comprised of \$185,207.94 previously deferred and \$1,459,447.76 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 9 sets forth a detailed breakdown of these expenses incurred during the period December 2019 through November 2020.

ATTACHMENT 10

Athens

Description: The former Athens MGP (The Athens Gas Light Company and The Athens Gas Light and Electric Company) operated from about 1872 until about 1898. Historic Sanborn Fire Insurance Maps indicated the MGP structures included two gas holders, retort and purification buildings, and materials storage. Columbia has reviewed its corporate history and has determined that it is a successor to entities that owned and/or operated the Athens MGP.

During the prior years of 2014 through 2017, Columbia focused efforts to contact the property owner in order to negotiate access to conduct the Ohio VAP Phase I and II Property Assessment. Columbia also met with additional stakeholders from the City of Athens, Ohio University, and Athens County Health Department as community outreach prior to starting the investigation.

In November 2018 access was obtained from the City of Athens, Ohio University, and MGP property owner and the investigation began onsite and adjacent properties.

During the twelve-month period ending in November 2019, additional investigation activities were completed including soil sampling, a Tar-Specific Green Optical Screening Tool (TarGOST®) investigation to identify and delineate DNAPL impacts at the Site, a Geoprobe Direct Image Low-Level MIP ("LL MIP") investigation to identify and delineate Volatile Organic Compounds ("VOCs"), additional groundwater wells were installed several groundwater sampling events were performed and several soil vapor/indoor air sampling events were completed.

During the twelve-month period ending in November 2020, two rounds of investigation groundwater sampling was completed, additional ground water evaluation was undertaken, indoor air sampling was completed in occupied buildings, and the annual cost modeling evaluation was completed. An additional groundwater sampling event will take place in early 2021. The Remedial Alternatives Evaluation will also be finalized in early 2021.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2013 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$650,946.37. This amount is comprised of \$581,517.56 previously deferred and \$69,428.81 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 11 sets

forth a detailed description of these expenses during the period December 2019 through November 2020.

ATTACHMENT 12

Portsmouth

Description: The former Portsmouth MGP operated in the vicinity of West Second, Madison and Jefferson Streets in Portsmouth between 1884 and 1905. Historical Sanborn Fire Insurance Maps indicated that MGP structures included three gas holders, retort and purifications buildings and materials storage. Columbia has reviewed its corporate history and has determined it is a successor to entities that owned and operated the MGP.

A Phase I environmental site investigation and phase II site investigation were initiated in 2014 and 2015. Supplemental phase II site investigations were completed in 2015 and 2016. Remediation of the “northern parcel” soil impacts was completed in 2018 and a No Further Action letter was issued by the VAP CP for the site.

During the twelve-month period ending November 2019, efforts were successful in negotiating access with the property owner to the “southern parcel” of the MGP. In November 2019, a pre-design investigation was initiated and completed in December.

During the twelve-month period ending November 2020, a remedial design was created and put out to bid, and the remedy was awarded. Remediation of MGP subsurface soil impacts was initiated on the southern parcel in June of 2020 and substantially completed by the end of August. Well abandonment activities occurred in October of 2020 as well as the annual cost modeling evaluation. An environmental restrictive covenant (ERC) was recorded on the southern parcel in August 2020. Anticipated work for 2021 is No Further Action (NFA) documentation by the VAP Certified Professional.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2013 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$3,509,054.44. This amount is comprised of \$1,491,316.38 previously deferred and \$2,017,738.06 (through November 2020 for work performed during the period December 2019 through November 2020. Attachment 13 sets forth a detailed description of these expenses during the period December 2019 through November 2020.

ATTACHMENT 14

Lorain

Description: In 2013 and 2014, Columbia authorized a history consultant firm to research corporate successors to the late nineteenth century and early twentieth century entities known to have been associated with the former MGP Site located in Lorain, Ohio. In addition, Columbia asked that this review include a confirmation of site ownership, past operating practices, and available historic information to aid in future site evaluation. Columbia has reviewed its corporate history and has determined that it is a successor to entities that owned and/or operated the Lorain MGP.

During the twelve-month period ending in November 2014, limited activities were completed to finish the historic evaluation and update the contingent environmental liability.

No activities were performed during the twelve-month periods ending in November 2015, 2016, 2017, and 2018.

During the twelve-month period ending in November 2019, Columbia contracted with a consultant to begin the process of conducting a Phase I and II project assessment in conformance with Ohio's VAP. A formal Communication Work Plan was developed and efforts were made to identify and contact the property owners in order to negotiate access to the Lorain MGP.

During the twelve-month period ending in November 2020, Columbia met with the property owners in order to negotiate access to conduct the Ohio VAP Phase I and II Property Assessment. Access has not been granted. In addition, the annual cost modeling evaluation was completed.

In the future, Columbia will continue to pursue access to conduct investigations consistent with Ohio VAP and conduct community outreach and negotiate access as required.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2013 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$26,861.09. This amount is comprised of \$1,473.00 previously deferred and \$25,388.09 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 15 sets forth a detailed description of these expenses during the period December 2019 through November 2020.

Elyria

Description: The former Elyria MGP operated from 1878 to 1902 on Maple Street (renamed Locust Street) in Elyria, Ohio, on property that was subsequently used by others for solvent recovery operations and which is now designated as a Superfund site. Companies that contributed used solvents in those operations and are now working to remediate the site under the direction of U.S. EPA ("USEPA") and Ohio EPA. Columbia has reviewed its corporate history and has determined it is a successor to an entity that owned and operated the MGP.

The Elyria MGP occupied a property with a long history of commercial and industrial uses which started with the MGP (for over 20 years) and ended with solvent recovery operations (also for over 20 years), but also included the other industrial uses summarized below for relatively brief periods:

- I.T.S Rubber Company for shoe manufacturing (rubber heels of shoes);
- Standard Oil facility;
- Sinclair refining facility;
- Coal Yard;
- Concrete Facility;
- Heat and Stove Facility;
- Machine shop;
- Foundry; and
- Ice company.

The waste solvent reclamation activities at the site were operated by Obitts Chemical Company (1960 to 1974) and then Chemical Recovery Systems ("CRS") (1974 to 1982). These facilities processed petroleum solvents, chlorinated solvents, and related petroleum wastes and marketed them for reuse. USEPA filed a lawsuit against CRS in 1981, requiring the owners to abate environmental issues that had been identified at the site. CRS completed a limited soils removal effort under USEPA Order and then filed for bankruptcy in 1982.

USEPA subsequently ordered CRS to conduct additional environmental remediation in 1983 that included additional soil excavation and erection of a site security fence. In the 1980's little happened at the fence site. Ohio EPA, USEPA and

other agencies conducted assessments of site conditions during the 1990s and ultimately added the site to the Superfund list and negotiated an Administrative Order with a number of potentially responsible parties (“PRPs” or “Settling Parties”) that had contracted historically with the former CRS to dispose of or recycle spent solvents in 2002. Since 2002, these Settling Parties have conducted remedial investigation and reviewed remedial options for the site in a Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”)-type program with USEPA and Ohio EPA oversight.¹

Studies completed by the Settling Parties identified impacts that resembled those from former MGP operations mixed with their solvent reclamation releases. A historic evaluation was conducted in which they identified Columbia as a successor to the MGP operator. They contacted Columbia and asked that Columbia become a participating member of the Settling Parties cleaning up the site.

The contamination identified at the site has impacted ground water in fractured bedrock beneath the site, and thus remediation to traditional USEPA clean up standards was not considered to be possible within a 30 year time frame. The Settling Parties proposed a technical impracticability (“TI”) waiver for site cleanup, which would allow contaminants under the site to remain without removal (at a substantially lower cost). USEPA has requested further investigation before it will decide whether to grant the requested TI waiver. That investigation work is expected to continue through 2020 and perhaps beyond.

In October of 2018, the USEPA issued Columbia a General Notice Letter for the CRS Site indicating that it may be responsible under CERCLA, USEPA encouraged Columbia to communicate/work with the PRPs conducting work at the site. As a result, in the twelve-months ending 30 November 2019, Columbia incurred costs to evaluate work being conducted by the Settling Parties and proposed by USEPA to complete site characterization and to support the approval of a TI approach for the site. In addition, Columbia has secured technical experts to better understand the nature of the MGP site’s contribution to the site contamination in order to support the negotiation of prudent participation at the site and potentially with the PRPs.

During the twelve-month period ending November 2020, Columbia initiated a negotiation of a USEPA Removal Order to allow work to complete an investigation of the former manufactured gas plant facilities. As part of this USEPA process,

¹ CERCLA is commonly known as the federal Superfund Law for clean up at the site.

Columbia developed a Field Sampling Plan to detail proposed remedial investigation activities within the footprint of the former holders to address current data gaps associated with the former holder pit. It is anticipated the Order and Field Sampling Plan will be finalized in early 2021 to allow the investigation of the MGP to be completed in 2021. In addition, the annual cost modeling evaluation was completed.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$84,225.06. This amount is comprised of \$62,459.64 previously deferred and \$21,765.42 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 17 sets forth a detailed description.

ATTACHMENT 18

Columbus I

Description: The former Columbus I manufactured gas plant operated from 1846 to 1904 on property bounded by West Spring, North Front, West Long and Marconi Streets in downtown Columbus. The western 50% of the parcel was formerly used for parking, however this property was recently purchased and the parking garage closed and demolished. Redevelopment of this parcel is planned, but the schedule is unknown. The northeast quarter of the property is occupied by the Bureau of Workers Compensation and the southeast quarter is the Michael B. Coleman Governmental Center.

In 2012 and 2014, Columbia authorized a history consultant firm to research corporate successors to the late nineteenth century and early twentieth century entities known to have been associated with the former MGP Site located in Columbus, Ohio. In addition, Columbia asked that this review include a confirmation of site ownership, past operating practices, and available historic information to aid in future site evaluation. Columbia has reviewed its corporate history and has determined that it is a successor to entities that owned and/or operated the Columbus I MGP.

Additionally in 2014, Columbia retained a community relations specialist to begin the development of a community relations plan and fact sheets in anticipation of negotiating access to perform a Phase I and Phase II environmental site investigation. In 2019 a formal Communications Work Plan was completed. It is anticipated that access will be negotiated with the current owner and if allowed a Phase I investigation.

During the twelve-month period ending November 2020, there were no additional activities performed except for updating of the site cost model.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$2,991.78. This amount is comprised of \$1,728.41 previously deferred and \$1,263.17 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 19 sets forth a detailed description.

ATTACHMENT 22

Fostoria II (Wood Street)

Description: The former Fostoria II manufactured gas plant operated from approximately 1887 to 1901 on property located at 209 N. Wood Street in downtown Fostoria, Ohio. Columbia authorized a history consultant firm to research corporate successors to the late nineteenth century and early twentieth century entities known to have been associated with the former MGP Site. In addition, Columbia asked that this review include a confirmation of site ownership, past operating practices, and available historic information to aid in future site evaluation. Columbia is reviewing its corporate history to determine if it is a successor to entities that owned and/or operated the Fostoria II MGP.

During the twelve-month period ending November 2019, Columbia contracted with a consultant to begin the process of conducting a Phase I and II project assessment in conformance with Ohio's VAP. Also, a formal Communication Work Plan was developed. It is anticipated that access will be negotiated with the current owner(s) of the former MGP parcel in 2020 prior to the completion of a Phase I.

During the twelve-month period ending November 2020, there was no additional activities performed except for the updating of the sites cost model.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$4,525.37. This amount is comprised of \$3,262.00 previously deferred and \$1,263.37 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 23 sets forth a detailed description.

ATTACHMENT 24

Toledo II

Description: The former Toledo II MGP operated in the vicinity of West Central Avenue and Interstate 75 in Toledo, Lucas County, Ohio. The site is currently owned by the City of Toledo, and occupied by the Division of Streets, Bridges and Harbor.

The former MGP operated on the site from 1918 to 1945 under the Atlas Chemical Company (1918-1928) and the Ohio Fuel Gas Company (1928-1945). Both Atlas Chemical and the Ohio Fuel Gas companies were, ultimately, subsidiaries of Columbia, confirming that Columbia Gas is a successor to entities that owned and/or operated the Toledo II MGP.

The Ohio Fuel Gas Company abandoned operations at the Central Avenue plant in 1945 and eventually sold the property in 1951. Ownership of the property changed several times between 1951 and 1973 when purchased by the City of Toledo. According to Sanborn Insurance Fire Maps, the various former MGP structures were razed by the different owners during the period of 1952-1976.

No activities were performed during the twelve-month periods ending in November 2015, 2016, 2017, and 2018. Activity during the twelve-month period ending November 2019 included record review and drafting a community relations plan.

During the twelve-month period ending November 2020, there were no additional activities performed except for updating of the annual site cost model.

Total Project Costs to Date: Total incremental costs incurred by Columbia during the period December 2008 through November 2020, exclusive of the \$25,000 to be funded by Columbia, were \$2,600.80. This amount is comprised of \$1,337.43 previously deferred and \$1,263.37 (through November 2020) for work performed during the period December 2019 through November 2020. Attachment 25 sets forth a detailed description.
