A 2.4 magnitude earthquake was experienced last night, 01.22.21, in Shawnee Township. I would like the OPSB to formally request and/all plans, specifications, shop drawings, and testing data for the PV solar panels, tracking systems, and motors being specified for this project so they can be reviewed for potential future natural disasters and/or response. Additionally, I would like to request from the OPSB and/or Lightsource BP/Birch Solar, LLC and published studies, by independent agencies, on the effects of earthquakes on utility-scale solar developments.

This information should be made available, and in short order. The Allen/Auglaize County residents should be made aware of the potential adverse and harmful affects such natural events could have within the Birch Solar development.
