PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Application of Xiber, LLC	)	TRF Docket No. 90-
Petition for Designation as a High-Cost Rural		
Competitive Eligible Telecommunications	)	<u>Case No.21-0141-TP-UNC</u>
Carrier.	)	.
	)	

**APPLICATION OF XIBER, LLC FOR DESIGNATION AS A  
COMPETITIVE ELIGIBLE TELECOMMUNICATIONS CARRIER**

Pursuant to Section 214(e)(6) of the Communications Act of 1934, as amended (“Act”) and Section 54.201 of the rules of the Federal Communications Commission (“FCC”), Xiber, LLC (“Xiber” or “Company”) respectfully requests designation as an eligible telecommunications carrier (“ETC”) by the Commission, as a telecommunications carrier eligible under the provisions of Section 54.201(d) of the FCC’s rules to receive federal Universal Service Fund (“USF”), including support through the FCC’s Rural Digital Opportunity Fund (“RDOF”) for the census blocks listed herein. In order to meet the requirements for RDOF funding, Xiber is obligated to obtain ETC designation within 180 days of the RDOF Phase I Auction Closing Public Notice (i.e., by June 7, 2021), and therefore requests expeditious action so that it may meet this requirement.

**I. INTRODUCTION AND COMPANY BACKGROUND**

Xiber is a limited liability company organized in the state of Delaware. Its principal place of business is located at 3500 Depauw Boulevard, Suite 1042, Indianapolis, IN 46268. Xiber was authorized to do business in Ohio on April 17, 2017 and is in good standing in the state. (See *Attachment 1*). Xiber is a subsidiary of Hawaii Dialogix Telecom LLC (“HDT”), a Delaware LLC with principal offices located at 3375 Koapaka Street, Suite B284, Honolulu, HI 96819. HDT holds a 93% ownership interest in Xiber.

On December 7, 2020, the FCC announced the winning bidders for the RDOF Phase I auction (Auction 904), which will award \$9.23 billion in support over a ten-year period to service providers that have committed to offer voice and broadband services to fixed locations in rural, unserved high-cost areas. HDT was announced as a winning bidder for a total of 16 locations in the state of Ohio with a total support amount of \$102,786 and has assigned the awarded funding to Xiber (See *Attachment 2*). A list of the census blocks identified for service is included in *Attachment 3*. Xiber is required to buildout to 40% of the requisite number of locations in the designated census blocks within three years of authorization and 20% in each year thereafter until Xiber completes its buildout.

As an ETC, Xiber will provide facilities-based fixed broadband and voice services to residential and business customers in rural and remote areas of Ohio using fixed wireless and fiber technologies. With its RDOF support, Xiber will construct and operate a new state-of-the-art fiber optic and fixed wireless network to provide 1000 Mbps/500 Mbps high-speed broadband Internet access services to the census blocks listed in *Attachment 3*. Xiber will provide interconnected VoIP services over its broadband internet facilities at rates consistent with the requirements for receiving RDOF support. As described more fully below, Xiber meets all of the statutory and regulatory requirements for designation as an ETC in the state of Ohio.

All correspondence, communications, pleadings, notices, order, and decisions relating to this application should be sent to:

## **II. RURAL DIGITAL OPPORTUNITY FUND AUCTION**

On January 30, 2020, the FCC established RDOF to ensure continued and rapid deployment of broadband networks to underserved Americans. RDOF will commit up to \$20.4 billion over ten years to support the availability of high-speed broadband networks in rural America. RDOF Phase 1 targeted areas wholly unserved by 25/3 Mbps broadband. Support was awarded through a reverse auction in which auction participants submitted bids based on a combination of performance and latency requirements.

The Phase 1 auction concluded on November 25, 2020 and awarded a total of \$9.23 billion in support over ten years. HDT was awarded approximately \$6 million of this support to provide broadband and standalone voice services in three states – Michigan, Illinois and Ohio -- including \$102,786 in Ohio. Consistent with the processes established by the FCC, HDT assigned its winning bids to its subsidiary, Xiber.

In addition to receiving an ETC designation from each relevant state authority by June 7, 2021, all RDOF winning bidders are required to commercially offer voice and broadband service consistent with certain milestones and speed and latency requirements. RDOF recipients must offer service to 40% of the awarded locations statewide by the end of the third full calendar year following funding authorization, and 20% each year thereafter, resulting in 100% deployment to funded locations by the end of the sixth calendar year.

### **III. FCC REVIEW OF RDOF AWARD RECIPIENTS**

Pursuant to the FCC's *Rural Digital Opportunity Fund Report and Order* establishing the RDOF released on February 7, 2020, the FCC is responsible for reviewing the operational history and the financial statements of RDOF applicants. The RDOF applicant, HDT, was required to submit with its short-form application financial statements for 2019 as well as evidence that it has offered voice and/or broadband services for the last two years.

FCC also required RDOF applicants to report on their short-form application certain metrics from their financial statements (audited or unaudited) from the prior fiscal year to demonstrate sufficient financial qualifications to participate in the RDOF auction. Winning bidders will be required to provide more specific evidence of their financial qualifications in their long-form applications, which are due by January 29, 2021, to demonstrate that they have the financial qualifications to meet the RDOF public interest obligations.

The FCC also required applicants to submit in the short-form application sufficient operational information regarding their experience providing voice, broadband, and/or electric distribution or transmission service and their plans for provisioning service if awarded support. Such information was meant to demonstrate that an applicant has the technical qualifications to bid for specific performance tier and latency combinations. Specifically, the FCC required applicants to submit high-level operational information to demonstrate their capability of meeting the public interest obligations (e.g., speed, usage, latency, and service milestones) for each performance tier and latency combination selected.

Pursuant to the FCC's Public Notice establishing *Notice and Filing Requirements and Other Procedures for Auction 904* (FCC 20-77, rel. June 11, 2020), among other requirements, each long-form applicant will be required to demonstrate that it is technically qualified to meet the relevant RDOF public interest obligations in the areas covered by the winning bids by submitting technical information to support the operational assertions made in the short-form application. A long-form applicant is required to include a detailed technology and system design description, including a network diagram that must be certified by a professional engineer. The professional engineer must certify that the network is capable of delivering to at least 95 percent of the required number of locations in each relevant state, voice and broadband service that meets the requisite performance requirements. Xiber is submitting a copy of its FCC long form application under separate cover, with a request for confidential treatment.

Finally, as part of the FCC's requirement, within ten days after the release of the public notice indicating that the FCC is ready to authorize support, a long-form applicant must submit an irrevocable standby letter of credit issued by a qualified bank that is acceptable to the FCC, as set forth in section 47 CFR §54.804(c). The initial letter of credit must cover at least the first year of support for a state. Each year, before receiving support for the next year, the recipient must modify, renew or obtain a new letter of credit to ensure that its value is consistent with the FCC's rules.

These operational and financial obligations required of RDOF recipients under the FCC's rules will ensure that Xiber is and remains qualified to provide the supported services in Ohio.

#### **IV. DESIGNATION OF ELIGIBLE TELECOMMUNICATIONS CARRIERS UNDER THE COMMUNICATIONS ACT OF 1996 ("ACT")**

Pursuant to Section 214(e)(2) of the Act, a state commission may upon its own motion or request designate a common carrier to be an "eligible telecommunications carrier" for the purposes of receiving universal service support. Section 214(e)(2) requires the designated carrier meet the requirements of Section 214(e)(1), which states:

A common carrier designated as an eligible telecommunications carrier shall be eligible to receive universal service support in accordance with section 254 and shall, throughout the service area for which the designation is received.

(A) Offer the services that are supported by the Federal universal service support mechanism under section 254(c), either using its own facilities or a combination of its own facilities and resale of another carrier's services (including the service offered by another eligible telecommunications carrier); and

(B) Advertise the availability of such services and the charges therefore using a media of general distribution.

Section 54.201(b) of the FCC's rules require that a state commission shall upon its own motion or upon request, designate a common carrier as an ETC as long as the carrier meets the requirements of Section 54.201(d), which restates the requirements found in Section 214(e)(1) of the Act. Section 214(e)(2) of the Act and Section 54.201(c) of the FCC's Rules state that the state commission may, in the case of an area served by a rural telephone company, and shall, in the case of all other areas, designate more than one common carrier as an ETC for a service area the state commission designates, provided each additional requesting carrier satisfies Section 214(e)(1) of the Act and Section 54.201(d) of the FCC's Rules. Before designating an additional ETC for an area served by a rural telephone company, the commission shall find that such designation is in the public interest.

## **V. XIBER'S DESIGNATED SERVICE AREA**

In the *Rural Digital Opportunity Fund Report and Order*, the FCC identified census block to be designated as available for support through Auction. Per the award notice, HDT was awarded funding in five census blocks located in Hardin County, Ohio, which are listed in *Attachment 3*. As noted above, HDT is assigning its winning bid to Xiber, which is requesting ETC designation in those census blocks and associated wire centers.

The census blocks and associated wire centers in which Xiber is requesting ETC status are in those that the FCC determined were wholly unserved by broadband speeds of at least 25/3 Mbps and therefore included in the RDOF Auction Phase I. The census blocks awarded to HDT are contained within the Incumbent Local Exchange Carrier ("ILEC") service territories of CenturyLink (now Lumen) and Windstream Ohio. HDT is required to provide evidence of Xiber's ETC status to the FCC no later than June 7, 2021.

## **VI. XIBER SATISFIES THE REQUIREMENTS FOR DESIGNATION AS AN ETC**

Pursuant to Section 214(e)(2) of the Act, state commissions are authorized to designate as an ETC any common carrier that, through the service area for which the ETC status is sought, (i) offers the services that are supported by the federal universal service support mechanisms either using its own facilities or a combination of its own facilities and resale of another carrier's services, and (ii) advertises the availability of such services using media of general distribution. As demonstrated below, Xiber will satisfy these requirements and, therefore, should be designated as an ETC.

### **A. Xiber Will Provide Service Using a Combination of Its Own Facilities and Resale**

Consistent with Section 214(e) of the Act, Xiber will offer, throughout its supported areas, services through a combination of its own facilities and resale of another carrier's services. Xiber will procure Indefeasible Rights of Use of dark fiber or lit services from a regional datacenter to the service locality via an established Macro Tower. From there, Xiber will build its own hybrid RF/fiber network to provide services to end users.

## **B. Xiber Will Offer the Services Supported by the Federal Universal Service Support Mechanisms**

For RDOF support recipients, the FCC defines the supported service as qualifying voice service and conditions grant of funding on the offering of qualifying broadband service. As described below, Xiber certifies that it will provide the following services that are supported by the federal universal service support mechanisms.

1. *Voice Grade Access to the PSTN* - Pursuant to Section 54.101(a) of the FCC's rules, Xiber will provide voice-grade access to the PSTN by offering interconnected VoIP service on a standalone basis through a wholesale agreement with a third-party provider. Xiber will be legally responsible for dealing with customer problems, providing quality of service guarantees, and meeting the FCC's universal service requirements.
2. *Local Usage* – Xiber's service will include minutes of use for local service provided at no charge to end users (specifically, Xiber's service plans will offer unlimited usage within the U.S.). Xiber will comply with any and all minimum local usage requirements adopted by the FCC or the PUC.
3. *Access to Emergency Services* – Xiber will provide access to emergency services via 911 or E911. Xiber will have the ability to remain functional in emergency situations. Xiber has a reasonable amount of back-up power to ensure functionality without an external power source. Xiber will further be able to re-route traffic around damaged facilities by utilizing redundant fiber links and will be capable of managing traffic spikes resulting from emergency situations via network engineering design.
4. *Toll Limitation Services for Qualifying Low-Income Customers* – Xiber will not distinguish between the pricing of toll and non-toll calls in the pricing of its voice service, and accordingly it is not obligated to provide toll limitation services to qualifying low-income consumers.

5. *Broadband Internet Access Services* – Xiber’s broadband Internet offering will provide the capability to transmit data to and receive data by wire or radio from all or substantially all Internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service. Xiber initially plans to offer Internet service at speeds of 1000 Mbps/500 Mbps for \$85.00 per month. Xiber initially plans to offer standalone voice telephone for \$45.00 per month. Pricing will maintain compliance with the FCC’s annual rate surveys.
6. *Advertising the Availability of Supported Services* – Xiber will advertise the availability of each of the supported services described above and the availability of Lifeline benefits throughout its ETC service area by media of general distribution, including post cards, direct mailings, radio and television commercials, social media, and the Internet. Xiber will advertise in a manner reasonably designed to reach potential Lifeline consumers and make them aware of such offerings, as required by FCC rule 54.405(b). Xiber will conduct business solely under the applicant’s name and will not use additional service or brand names without authorization from the Commission.
7. *Provision of Lifeline* – Xiber will offer Lifeline service to qualifying low- income consumers in compliance with 47 C.F.R. Part 54, Subpart E.
8. *Five Year Plan* – Under separate cover Xiber is requesting a waiver of the five-year improvement and network deployment plan normally required of ETCs, as it will be subject to the specific milestones and service requirements established by the FCC for RDOF recipients.

### **III. PUBLIC INTEREST STANDARD**

Designation of Xiber as an ETC will serve the public interest by ensuring that Xiber is eligible to receive federal Universal Service Fund support and RDOF funding made availability by the FCC for the expansion of broadband and voice service in rural America. Xiber will use this federal funding to expand access to high-speed broadband and voice provided through interconnected VoIP. These services will support connectivity to residents and commercial businesses, who have been determined by the FCC to be wholly unserved by high-speed broadband service providers.

### **IV. CONCLUSION**

For the reasons set forth above, having demonstrated herein that Xiber satisfies all the conditions of eligibility necessary for designation as an ETC in Ohio, and having shown that grant of the certification will be in the public interest of consumers in Ohio, Xiber respectfully requests that the Commission expeditiously grant this Application on or before June 7, 2021 to designate Xiber as an ETC so that it is eligible to receive high-cost federal universal service funding.

Respectfully submitted,

/s/ Sharon Thomas

**Xiber, LLC**

**Exhibit A**  
**Five-Year Improvement Plan**

Under separate filing, Xiber is submitting a Motion for Waiver of the 5-year plan, which is not required under the FCC's RDOF rules.

## **Xiber, LLC**

### **Exhibit B**

#### **Evidence of Functionality in Emergency Situations**

In accordance with 47 C.F.R. §54.202(a)(2), Xiber will have the ability to remain functional in emergency situations. Xiber has a reasonable amount of back-up power to ensure functionality without an external power source. Xiber will further be able to re-route traffic around damaged facilities by utilizing redundant fiber links and will be capable of managing traffic spikes resulting from emergency situations via network engineering design. The Company's FCC Long-Form application, filed separately under seal, provides additional details regarding Xiber's network management.

## **Xiber, LLC**

### **Exhibit C**

#### **Public Interest Standard**

Designation of Xiber as an ETC will serve the public interest by ensuring that Xiber is eligible to receive federal Universal Service Fund support and RDOF funding made availability by the FCC for the expansion of broadband and voice service in rural America. Xiber will use this federal funding to expand access to high-speed broadband and voice provided through interconnected VoIP. These services will support connectivity to residents and commercial businesses who have been determined by the FCC to be wholly unserved by high-speed broadband service providers.

## **Xiber, LLC**

### **Exhibit D**

#### **Proposed Advertising Language**

Xiber has not yet developed its specific advertising language and does not have sample advertisements. It intends to advertise the availability of each of the supported services described above and the availability of Lifeline benefits, throughout its ETC service area, by media of general distribution, including post cards, direct mailings, radio and television commercials, social media, and the Internet. Xiber will advertise the availability of its services and charges in a manner reasonably designed to reach potential Lifeline consumers and make them aware of such offerings, as required by FCC rule 54.405(b). Xiber will conduct business solely under the applicant's name and will not use additional service or brand names without authorization from the Commission.
