I am writing to express my support for the Birch solar project's application with the Ohio Power Siting Board. I have had solar on my roof for 8 years and have generated over 50,000 kWh. This quiet and non polluting energy powers two cars with batteries, creating pollution free transportation as well as powering the home. On a commercial level, the benefits are multiplied as more homes and cars are powered by a non polluting source. Jobs, economy, taxes, etc. benefits are well documented. This project will be beneficial to all. Thanks
