As our property sits we have 4 sides of impact. 4 sides of direct impact. Not across the street. All around my house, right along my property line. Not 300 ft back from my property line but 300 foot from the center of my house. There is not a set back for ease of view. There is not a buffer zone. There are 4 inverters along my property line as well as an access road that butts up against my back yard. How is it legal or even morally right for them to do what they are doing to us. And how is it that we do not have a voice in this matter. This is my only resort is putting this in your hands. Please think of my family. Please think of my young son being raised around this cancerous by-product. Our tile will be crushed. Our property will flood.. Our well will pollute.. Think of my family's health and safety. Think of our community. Their families. Their health and safety.
