Emerson Creek Transmission Line
Case No: 19-1073-EL-BTX
February 9, 2021 Public Hearing
Transcript Changes

2021 FEB 26 PM 12:27

Dear Mr. Matt Butler:

In reviewing the transcript of my testimony posted on 2/17/2021 by the Ohio Power Siting Board, I found that some of my spoken words were misinterpreted. I feel they need to be clarified and corrected in the transcribed document. These changes are:

On Page 18 Line 18: ***Richfield*** should be ***Ridgefield***

My late husband and his two brothers farm 950 acres in Sherman, Lyme and Ridgefield Townships.

On Page 20 Line 1: ***intersect*** should be ***Interconnect***

(This sentence starts on page 19 Line 23.)

Note: One cannot talk about the collection substation, the overhead and underground transmission lines, and the POI Point of ***Interconnect*** substation without referring to the 71 proposed 660 foot tall industrial sized wind turbines being widely spread throughout our rural landscapes, our townships and communities.

On Page 21 Line 9: ***had*** should be ***add***

Then, when we ***add*** the presence and issues of the collection substation, overhead H-frame transmission lines, linkage of underground lines with additional turbines and the point of interconnect substation, property values will decrease even further.

On Page 23 Lines 8-13: There are two changes: ***Great humor*** should be ***Gregg Hubner***; ***their*** should be ***a***

Gregg Hubner, in Paradise Destroyed reports, ".... as we already know, the wind farm is not being built to harvest electricity or profit landowners — but to harvest the production tax credit and make ***a*** profit themselves."

Thank you for your time and consideration! It is appreciated very much!
