**PETITION OF TELEPORT COMMUNICATIONS AMERICA, LLC, FOR REVIEW OF  
A DECISION OF SOMOS - POOLING ADMINISTRATOR**

---

Teleport Communications America, LLC, a subsidiary of AT&T Inc., (“AT&T”), by its attorney and pursuant to 47 CFR § 52.15(g)(3)(iv), respectfully requests that the Public Utilities Commission of Ohio ("Commission") review and overturn the Pooling Administrator's (also referred to as "Somos") denial of AT&T's request for numbering resources, as more fully described herein.

An Ohio customer, University Hospitals, has requested 300 consecutive numbers in the Avon rate center. A copy of the letter from University Hospitals is attached as Exhibit A. University Hospitals is expanding to multiple locations, adding physicians and staff and constructing new facilities. It requests that the NXX code used to serve its facility not end in 0, 1 or 9. AT&T has developed a communication plan for University Hospitals and will assign the 300 numbers within 180 days of the numbers being made available pursuant to this request.

The Avon rate center, in the 440 area code, began number pooling in April 2002 and therefore number acquisition by a Number Pooling carrier such as AT&T is gained through an interface with the Pooling Administrator.<sup>1</sup> On February 22, 2021 AT&T submitted a “Thousand Block Application Form Part 1A” and a “Months-to-Exhaust and Utilization Certification Worksheet – TN Level” (“MTE and Utilization”) to the Pooling Administrator using the Pooling

---

<sup>1</sup> The federal rules in 47 C.F.R. § 52.15 generalize responsibilities of NANPA and the Pooling Administrator under the heading “Central office code administration.”

Administration System. Copies of these documents are attached as part of Exhibit B. AT&T requested 1 number block in the Avon rate center and subsequently received a denial from the Pooling Administrator dated February 22, 2021, indicating the request would not process via the system without a state waiver (“Response”). A copy of the Response is included as part of Exhibit B. The Pooling Administrator, applying FCC rules and INC Guidelines, requires a block holder requesting growth resources to demonstrate that existing resources in the rate center will both exhaust within 6 months and meet the 75% utilization level. The Response included calculations indicating that the utilization threshold was not met.

Although AT&T has adequate telephone numbers (~350 available numbers scattered in 440-695-6) in this rate center to satisfy incremental requests without receiving additional numbers, the inventory cannot satisfy the customer’s specific need for 300 consecutive numbers. Therefore, AT&T needs to obtain the number blocks to satisfy the customer’s request. The Industry pool for the Avon rate center does not have any numbers and so a new code needs to be opened. AT&T proposes to take 1 block and the remaining 7 will replenish the pool.

The FCC's rules identify a procedure whereby denial of a numbering resource request can be brought to the appropriate state commission for review. 47 CFR § 52.15(g)(3)(iv) provides as follows:

(iv) The NANPA shall withhold numbering resources from any U.S. carrier that fails to comply with the reporting and numbering resource application requirements established in this part. The NANPA shall not issue numbering resources to a carrier without an Operating Company Number (“OCN”). The NANPA must notify the carrier in writing of its decision to withhold numbering resources within ten (10) days of receiving a request for numbering resources. The carrier may challenge the NANPA's decision to the appropriate state regulatory commission. The state regulatory commission may affirm or overturn the NANPA's decision to withhold numbering resources from the carrier based on its determination of compliance with the reporting and numbering resource application requirements herein.

In addition, the FCC's December 12, 2001 Order in its Number Resource Optimization Report and Order, CC Docket No. 99-200, FCC No. 01-362, paragraph 64 states that, "States may not accommodate requests for specific numbers (i.e. vanity numbers), but may grant requests for customers seeking contiguous blocks of numbers." AT&T submits that University Hospital's request constitutes special circumstances and demonstrates a clear requirement that warrants the Commission's review and reversal of the Pooling Administrator's decision.

For the reasons set forth herein, AT&T respectfully requests that the Commission overturn the Pooling Administrator's denial and direct it to assign the requested numbers in the Avon rate center to AT&T for use by University Hospitals. AT&T further requests the Commission to expedite the request due to the customer's critical need for these numbers.

March 3, 2021

Respectfully submitted,

Teleport Communications America, LLC.

AT&T TNAC,

This letter of Intent represents a request by University Hospitals for 300 consecutive TN's for SIP service. University Hospitals intends to order service in the Avon OH rate center, pending AT&T's successful completion of the required testing. University Hospitals intends to activate these numbers within 180 days from AT&T's receipt of the numbers.

University Hospitals is expanding to multiple locations in the geographic area covered by area code 440, and continues to grow. University Hospitals has acquired, numerous physician practices, multiple affiliated buildings, and is in the midst of new construction to house additional doctors and facilities. In the next 1 to 3 years we expect to affiliate with additional practices in the same geographic area that will also need to be integrated into the enterprise phone system. In order to provide to provide administrative, physician offices, research, administrative, lab space and other system services with phone we require a consecutive block of 300 consecutive TN's.

To meet the needs of our dial plan we need a block of TN's where the prefix does not start with a 0, 1 or 9, i.e., 440-NxX-xxxx, where **X** cannot be 0, 1 or 9). The numbers will be installed as TN's on SIP trunking located at 1977 Healthway Dr., Avon, OH 44011, within 180 days from AT&T's receipt of numbers. We expect that this block will meet our requirements for at least the next three years. We do not anticipate returning any numbers to AT&T.

AT&T is our service provider and we understand that they might escalate this request to the state utility commission.

Sincerely,

A handwritten signature in blue ink that reads 'Jodi L Molner'.

Section 1.2 Service Providers (SP) who need a Thousands-Block (NPA-NXX-X) assignment or for a Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a Part 1 Central Office Code (NPA-NXX) Application needs to also be submitted to the Pooling Administrator (PA). The SP should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia Technologies, Inc. dba iconectiv (iconectiv<sup>®</sup>) LERG<sup>TM</sup> Routing Guide<sup>xi</sup>. The Operating Company Number (OCN) assigned to the SP and the OCN of its parent company. An OCN is a four-character alphanumeric NECA-assigned Company Code or a four-character alphanumeric identifier assigned by the iconectiv Telecom Routing Administration (TRA). In addition, the number of Thousands-Blocks requested should be supplied. The Switch Identification (Switching Entity/POI). Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider (SP) completes the application should be entered in this section, as well as the Effective Date of the requested Thousands-Block.

Section 1.4 Service Providers (SP) should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS or VoIP. Also indicate the primary type of business in which the Numbering Resource is to be used. SPs may indicate their preference for a particular Thousands-Block, e.g., 321-9XXX, or indicate any Thousands-Blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers (SP) indicate the type of request. Initial requests are for first applications for Thousands-Blocks in a Rate Center, Growth applications are for additional Thousands-Blocks in a Rate Center in which the Applicant already has Numbering Resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers (SP) shall indicate the updated/current information in regards to contaminated Telephone Numbers (TN) on the Thousands-Block they are returning to the Industry Inventory Pool. Thousands-Blocks with over 10% contamination (101 TNs or more) shall not be returned to the Industry Inventory Pool except when a SP is exiting the market or is exchanging a Thousands-Block that was identified as being over 10% contaminated. If the Thousands-Block being returned is over 10% contaminated, the Pooling Administrator (PA) shall seek a new Thousands-Block Holder. If question c and/or d have a response of No, the request for return shall be denied.

The Thousands-Block applicant certifies veracity of this form by signing their name, and providing their title and date.
