---

Members of the Ohio Power Siting Board,

Please consider the Yellow Wood solar project as a positive energy event in Clinton County.

We need renewable energy resources.

The studies indicate that a limited amount of disturbance will occur within the designated habitat and environment of the solar farm. As a result, I support these renewable energy efforts as long as precautions and regulations are strictly followed.

I have also asked several questions in regards to materials used within the panels and their recycling potential. I am satisfied with the potential.

Our Earth needs help; less fossil fuels and a reduction of carbon footprints. Solar energy in our country would be a start.

Thank you,

Rhonda Crum

Sincerely,  
Rhonda Crum
