Date: Saturday, April 17, 2021 9:03:52 AM

Dear the Public Utilities Commission of Ohio (the PUCO),

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

Martina Hainke

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

Subject: Public Comment for Case # 18-1004-EL-RDR - Protect Ohioans from High Electric Bills
Date: Saturday, April 17, 2021 9:04:10 AM

Dear the Public Utilities Commission of Ohio (the PUCO),

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

Elza Corrill

Date: Saturday, April 17, 2021 9:04:20 AM

Dear the Public Utilities Commission of Ohio (the PUCO),

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

Susan Gallagher

Dear the Public Utilities Commission of Ohio (the PUCO),

Think of the horse and buggy. When the automobile became popular, thousands of people who raised horses, cared for horses, and shod horses, as well as those who made and repaired buggies went out of business. It's waaaaaay past time to retire coal, nuclear, gas, and oil. We need to switch to clean, sustainable energies like solar (on my rooftop, an 11.4 KW array), wind, geothermal (in my country home side yard), biofuel, and others. This bill was shameful, immoral, illegal, and totally reprehensible. Let's have a full, complete and FINAL repeal, and make the switch to energies that will give our descendants a habitable planet! Let's show the world that Ohio isn't a dirty-dealing, Big Oil and Big Gas, fly-over, backwoods home of the uneducated. Let's be world-class clean energy leaders and show everyone how sustainable energy is done!!!

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

Subject: Public Comment for Case # 18-1004-EL-RDR - Protect Ohioans from High Electric Bills
Date: Saturday, April 17, 2021 9:04:30 AM

Dear the Public Utilities Commission of Ohio (the PUCO),

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

John Pluth

Dear the Public Utilities Commission of Ohio (the PUCO),

There's no logical argument to keep a Bill that is based upon \$60,000,000 in bribes and corruption. I would love to hear the mental gymnastics of anyone arguing for HB6.

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

Subject: Public Comment for Case # 18-1004-EL-RDR - Protect Ohioans from High Electric Bills
Date: Saturday, April 17, 2021 9:04:40 AM

Dear the Public Utilities Commission of Ohio (the PUCO),

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

Conleth Crotser Md

Date: Saturday, April 17, 2021 9:04:46 AM

Dear the Public Utilities Commission of Ohio (the PUCO),

Close these relics

The OVEC coal plants have consistently lost money for years. The PUCO and the Ohio Legislature have forced Ohio customers to cover these losses. The most recent audit of OVEC conducted as a condition of this cost-shifting found that the OVEC plants are being operated uneconomically, driving up customer costs even further.

The PUCO should take steps to prevent utilities from passing these losses along to customers. It is not prudent to allow cost recovery for times when it is more costly to operate the OVEC plants than purchase energy on the PJM market. The PUCO should also review whether passing along new capital costs into these plants at customer expense is prudent as well.

The PUCO should also take action to force AEP, Duke, and Dayton Power and Light to divest from the OVEC coal plants as they have long been ordered to do. Given the audit results, it is clear that further delay will only harm these utilities? customers

Sincerely,

Porscha Krieg
