This Birch Solar project is completely wrong for Shawnee Township. Destruction of prime agricultural land and negative effects on the lives and personal residences that will be affected by this proposed soon to be industrial waste project are my main reasons for being against this massive project. I believe in right not wrong and disagree with greed of the farmers who want to lease their land without regard to those it affects...their neighbors. I disagree with solar panels being made in China and solar waste they will create. The negative effects to our environment it will create are disturbing. This is the wrong place to place an industrial solar dump. BP is not a responsible company and will destroy the area completely. Flooding, chemicals leeching in to water supplies, destruction of wildlife, beauty of the land. I could go on and on. This project is wrong in so many ways. Why would you allow such a dangerous massive project in such a highly populated area? Please don't approve this industrial solar project. It will be destructive to the health and well being of many people.
