You've heard a few of my complaints, here's another.

We have some road issues such as small potholes by shoulder in numerous areas with long cracks in asphalt also by shoulders, so in addition to death risks to humans and animals through toxic run off into soil and waterways, animal diversion (cut off) from animal highways and forced onto rds, endangered and other birds natural flight path and hunting areas all being destroyed, not even to get into historical objects (arrowheads etc) I personally saw crews of men combing fields and collecting and pocketing(where are they now?).the lies and deceptions are aplenty...anyway...who's expected to pay for the road repairs that will need done?! As now they are in need of "spot repair" that isn't done as needed...is lightsource bp responsible for having the roads repaved not just pitch and bit chipped as they should, already for their increased usage while "survey" crews combed the fields "working" and stealing historic artifacts

STOP THE SOLAR PROJECT! Too many cons that definitely outweigh the pros! And if you need this explained, then you are seeing the dollar signs and NOT the environmental codts!
