We are a small farm owner in Highland county where our farm will be connected to the above solar farm project. We are concerned about losing our right to vote on the uses of land in highland county. We are concerned about the effects these farms will have on the environment. The effect on our soil, our plant life and on the animals. It will change our natural system. It will fence in thousands of acres and the wildlife will have to be eliminated. We oppose that. The loss of good productive farm land is devastating. We have lived in highland county all our lives. It is a beautiful place to live but it has and is being turned in to a solar junkyard. We are asking that you deny the application for the Dodson Creek solar farm. We ask that before you vote on these solar farms that are being asked for approval in highland county you drive down here and see the damage that those have made in highland and our adjoining brown counties. St rt 286 has a solar farm that is operational. Look at the water laying under these.
