Re: Union Ridge Solar, LLC, Case No. 20-1757-EL-BGN

Dear Ms. Troupe:

On March 26, 2021, Union Ridge Solar, LLC filed an application to develop, construct, and operate a 108 megawatt solar-powered electric facility in Harrison Township, Licking County, Ohio. As described in Application Section 4906-4-05, the Facility will interconnect to AEP's Kirk substation, approximately 1,500 feet northwest of the Facility. Two collection substations, gen-tie lines, and O&M facilities are represented in the Facility design. The two gen-tie routes are described in the Application as "Alternative East" and "Alternative West." The final location of these components will be determined during the Application review.

This letter is to confirm that the Applicant has selected the "Alternate West" gen-tie route for the Facility. The Applicant respectfully requests that this route be evaluated by OPSB Staff during its investigation.

Please do not hesitate to let me know if you have any questions.

Sincerely,

Dylan F. Borchers
