My wife and I moved to the area two years ago and upon learning about the pending solar farms overtaking the area have already talked about putting our home and land up for sale. We did not move to this area to be surrounded by these panels and the landscape completely ruined. The property values will surely decline and the majority of the people who live here do not want this. The environmental impact on this area should be investigated by ODNR prior to any of these plans being approved. As should wildlife studies due to the multiple pairs of mating Bald Eagles in the area, some of which are directly where these panels would be placed. The local elected officials are clearly not listening to the wants of their constituents. It's a disgrace.

I feel that the overwhelming land grab by industrial solar generating power plant developers who have teams of expert attorneys is an example of unfair advantage that is occurring in our small rural community.

Our state lawmakers need to create a team of attorneys for us, the citizens of Ohio, who are being exploited by unscrupulous corporate power.

This is a dehumanizing process as we are not legal scholars that are able to defend ourselves. We ask, why are our district representatives setting idly by doing nothing to assist us to halt the plunder of our community?

Please Support SB52 and bring fairness back to the state of Ohio.

Sincerely,

Clinton County/Highland County Citizens Concerned about Solar Farms.

We are almost 600 members and growing by the day as more hear this story of this injustice that is being done in our rural community.
