I have witnessed several of the Solar Farms in Ohio. It is a hideous, debilitating, atrocious site. Your encroachment upon the well established agricultural community is nothing more than rape. The beauty, the solitude, the environment, the ecology, the water supply, the EMF radiation, the roads, the healthy of my family are all in jeopardy. My wife has lived in this Eden for 75 years and now you are going to raze God's creation. Instead of looking out to see trees, wildlife, crops, and greenery I must peer at Solar panels. Like Eve and the apple, you have tempted farmers and investors (many of whom do not live in the area) with money to rape the community. I recently attended a meeting on Solar Farms and to see residents crying of their future loss is sinful. The energy created by these monstrosities may not even be used in the area. But we will forever suffer the devaluation of our properties and lose the sight of a prosperous agricultural community. A committee of over 700 oppose this exploitation. Yet some will line their pockets while the majority suffer. We totally detest your plans! WE THE PEOPLE OBJECT, but in today's technology it does not mean a xxxx.
