8700 Tri County Hwy., Sardinia, OH should put us right at the railroad crossing.

I did want to confirm what the address should be for the Tri County location. The existing meter there appears to be 12391 Martin Alexander Rd. What is the new address? Just making sure everything matches up. Thank you!

This is an **EXTERNAL** email. **STOP. THINK** before you **CLICK** links or **OPEN** attachments. If suspicious please click the '**Report to Incidents**' button in Outlook or forward to incidents@aep.com from a mobile device.

Justin:

Any developments from AEP engineering for both the Stieman and Tri County railroad crossings? The PUCO has issued an Order and we would like to get moving on setting meter poles.

Thanks,

Mike Forte'

Justin:

One additional item on the railroad signals. The tips of the roadway gates on the crossing signals will be 24' in the air when vertical. Six feet of clearance is required. If you design wires above the signals, shown on the plans I provided yesterday, please keep this in mind. Wires behind the signals better than above.

I did call in Tri County Highway but received the following: The disconnect order number is 101381707, and the reconnect order number is 108614189. The email they referred to this as the electrical supply at 3635 Lawshe Rd. Not sure why, but I mentioned it to Sherlyn Myers.

Thanks for meeting yesterday,

Michael,

As we discussed yesterday I will begin to lay out the designs so we can get easements and finalize the costs. Once you have inspections they can be sent to 046NSD@aep.com. We are also going to need that other location on Tri County Hwy called in so we have an order. Please let me know if you have any questions. Thank you!
